AIR MOTOR ROAD TO LOOP BOSTON URGED IN BILL

From Cottage Farm Bridge to North and South Stations and Market

COST IS ESTIMATED ABOUT \$15,000,000

Measure Filed in Legislature Based on Plan of W. J. Mc-Donald-Approved by Mayor

An elevated motor traffic highway looping the market, financial and water-front districts of downtown FLIERS COMPETE Boston, connecting the North and South Stations, extending on one end through the Back Bay section to a junction with Commonwealth Avenue at Cottage Farm Bridge and on the other end extending across the Charles River Dam to Lechmere Square, Cambridge—this is the plan embodied in a bill placed before the Legislature today by W. J. McDon-

Legislature today by W. J. McDonald, Boston real estate operator and developer of the Park Square district and others including V. C. Bruce Wetmere. The bill was filed by Martin Hays, Representative from Brighton. This aerial highway would utilize existing rights of way along almost its entire route, and could be built for a small fraction of what any comprehensive program of street widening would cost, Mr. McDonald said. It would be built above the tracks of the Boston & Albany Railroad from Cottage Farm station to a point near the South Station. There it would go upon the structures of the Atlantic Avenue elevated railway line, which the Metropolitan way line, which the Metropolitan Planning Division already has recommended should be turned into an elevated automobile highway.

Near the North Station the new route Near the North Station the new route pany; Gov. John H. Trumbull of "This is just as if a merchant of the company; Gov. John H. Some colleges have appealed to students to pay the difference if the contract, but the contract the con would strike across the yards back of the North Station and along the dam to Lechmere Square. **Estimated Cost \$15,000,000**

Cost of the proposed traffic way ould not exceed \$15,000,000, Mr. McDonald believes, and in his opinion it would relieve downtown traffic congestion more than any ground-level street improvements which cost of all the construction work involved, including reconstruction of the elevated tracks for roadway use and construction of ramp approaches at the principal cross streets, is estimated at \$8,500,000. The addition, it is estimated that \$6,500,000 would be expended for land damages and for the conjecture.

Not only would the new structure provide a 40-foot traveling surface for four lanes of traffic, but, this traffic would be freed entirely from any cross street interruptions and so could cover the whole route at continuous expendence of the street improvements which the street improvements which the colonial Air Transport Company is backed by many intendist of the total intendist of particular intendists and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England, including Governor Trumbulisess and political men in New England in levil be the third received by the Post Office Department for the New York-Chicago mail contract of McDonald believes, and in his opin-

washington, Jan. 15 (P)—As Congress continues to debate the Coolidge Administration's policy in try has offered to arbitrate," said Mr.

> Referring to Nicaragua, he de clared that "precedent is no defense for a wrong action."

"The people of the United States have no sympathy, in my judgment, with a policy which presumes to tell the people of Nicaragua they must have the kind of government we want them to have," he continued, and added a protest against a policy of bullying Nicaragua when we should

be playing the big brother."

Mr. Heflin then took up the attack declaring \$1,000,000 had been raised in the Knights of Columbus convention in Philadelphia last August "to help carry on war

Termed Demand for War "The resolution passed by the Knights of Columbus, convention,'

Mr. Heffin said, "amounted to a de-"I am not denying the Knights of right." mand for war with Mexico.' Columbus the right of petition," he said, "But I am opposed to any church seeking to plunge this coun

try into war. No Protestant church can do that with my approval."
Mr. Heflin's charge was described as "incredible nonsense" in a state-ment issued later from New Haven, Conn., by James A. Flaherty, supreme head of the Knights of Columbus. "The accusation that the Knights of Columbus in their 1926 convention pledged themselves to propaganda to force the United States into war with Mexico is utterly unfounded and un-just," declared Mr. Flaherty.

TIGERS ENTERTAIN. NEW HAVEN TONIGHT

Eagles meet tonight in a Canadianent the political peridy of the White House and constitutes a dark presage for the future of the contiteams regard each other as rivals and Casella and Boston have met only once this season, Boston winning the decision by a score

An interesting feature of them games is the fact that New Haven, on games is the fact that New Haven, on paper, has by far the stronger team. New Haven leads the league at present with 14 points, while the Tigers are in second place, one point behind. Boston can regain the lead by winning. Springfield entertains Providence in another C.-A. H. L. match tonight and a win for Providence and a defeat for Boston will put the Rhode Island team in second place. The Eagles will be somewhat weakened by the loss of Stanley Jackson in center ice. He has been sold by Ottawa to the London club of the Canadian center ice. He has been sold by Ottawa to the London club of the Canadian Hockey League. Charles Cahill, Boston Bruin property, playing right wing for New Haven, may not play tonight. He has broken training rules and is under suspension, but it may be lifted tonight.

The Tigers will resort to the team play taught them by Coach Powers and they expect to defeat the visitors and regain the lead of the league which they have held most of the Mason. The locals' drop from first place was caused by the three victories which Providence has taken from them. Only one other team, Springfield, has defeated them.

Interference by the Federal Gov-ernment in the domain of the states. which he declared was exemplified in recent federal regulations, were attacked by James Reed (D.), Sena-tor from Missouri, in an address at the opening session. Scheduled to speak on "The Liberty of the Press," Mr. Reed opened his talk with a warning to journalists to be on guard against court decisions and federal regulations tending to curb "free speech and free writing," at-tacked the war-time restrictions on freedom of speech, and ended by a declaration that "inder the pretext of employing the constitutional powers of the Government, the Fed-eral Government has absorbed au-thority little short of usurpation."

He pointed to a recent argument by the Solicitor General of the United States in a case before the Supreme Court, in which it was urged that the

freedom of the press as guaranteed by the Constitution goes only so far as the freedom given it under the English common law, as evidence must be free to criticise the Govforbidden during the late war, Mr. Reed said

Sees Journalism on Up-Grade Erie C. Hopwood, president of the ics when they turn right around and Society, in his opening address on the accomplishments of the past year, "Along what line do you want your ethics? Along the line of news? the importance of newspapers in our along the line of advertising? or social organization, a keener realiation the line of subscription-getzation by editors of their high responsibilities and a growing tendency to write of the merits of issues rather than of the personalities involved, as significant developments in American urnalism.

He urged editors to utilize constructive criticism, rather than re-senting it, and deprecated efforts of a minority of newspapers to offend tenets of good taste and standards of public morals in the efforts to humanize" their pages.

He recommended that the society

appropriate a fund of from \$20,000 to \$25,000 to set up an office and a legal staff to investigate charges for contempt of court and other legal ac-tions brought against newspaper writers and editors.

Numerous appeals for the society to take action in such cases have been refused during the past year rough lack of proper investigation machinery, Mr. Hopwood said.

Music in Boston

Alfredo Casella, as guest conduc-

tor, led the Boston Symphony Orchestra yesterday afternoon at Symphony Hall in the twelfth concert of the current Friday afternoon series. Walter Gieseking, pianist, and Rulon Robison, tenor, were the soloists, the latter singing the folk song which occurs in Casella's ballet suite. The program comprised Vivaldi's Con-certo in A minor for String Orchestra (aranged by Sam Franko), Mozart's Concerto in C major for Piano-

making a mosaic of the music he third, these are evidence of purpose-traversed. Phrase by phrase it went, ful and coherent writing. cleanly rhythmed, sharply approached. Patterns traced themselves deftly. Lines of melody crossed each other in carefully marshaled array. Dissonances were stressed according to the current feather. But overwhing progressed

alyze and consider and assimilate. revealed Mr. Casella's guiding hand Here was Mozart modernized, with brass sharp-edged and biting rather than played with the mellowness tradition ascribes to the "classical"

modernized, was the final outcom Symphony Orchestra of the conductor's manner. To the Mozart Mr. Gleseking, as the soloist, also brought his persuasive powers. The grace and finish and luster he revealed in Boston a year ago again were in evidence. Delicate runs and trills well deserving of the old-fashioned adjective "pearly" decorated the finely wrought music. Form and outline stood forth clearly. And since Mr. Gieseking is as much a modernist as is Mr. Casella, the cadenzas of the soloist betrayed flashing linear dissonances and

snatches of brilliant coloring. Eighteenth century music has oubtless inspired Mr. Casella as it forte and Orchestra, Casella's Partial for Planoforte and Orchestra, and Casella's Orchestral Suite from the his music bear every mark of present-day tendencies. One could no mistake his compositions for mistake his compositions for Casella's Orchestral Suite from the his music bealt to the hallet "La Giara." The Mozart alone had been heard in Boston on previous occasions; the others had their those of another generation than one could ascribe the radio to the nine-could asc ous occasions; the others had their first performance here.

It is almost four years since Mr. Casella led the Boston Orchestra, so for many he was a newcomer. The audience received him in anticipatory mood, since guest conductors are mood, since guest conductors are rare with this orchestra. Appreciative applause followed the Vivaidi and the Mozart. But enthusiasm ran mood. No musician worthy of contract the model of and the Mogart. But enthusiasm ran moved. No musician worthy of conhigh only when Mr. Casella's own sideration could escape the influence compositions were completed. For a of Debussy and Strauss and Stravinstriking difference of approach manifested itself in the conductor's methods with the eighteenth century works and with his own. In the Vivaldi he pursued a precise, exact spaces of the second, and the boiscourse. It was almost as if he were the description of the second, and the boiscourse.

ful and coherent writing.

A more evident originality manifests itself in the suite Mr. Casella has drawn from his Sicilian ballet "La Giara." It teems with rhythmic vitality and surging melodic under-currents. Its orchestration is tersely fashion. But everything progressed as by plan. The listener might analyze and consider and assimilate.

Voice Sent on Beam of Light in Test of Ultra-Violet Rays

Music Translated Into Light Flickers and Made Audible in Radio Set by Professor at Massachusetts Institute of Technology

Transmission of a human voice on a beam of light was demonstrated yesterday by Prof. Donald C. Stockbarger of the department of physics at Massachusetts Institute of Technology at a private lecture to students on "Invisible Light and Its Effects." He launched the waves of musical and instrumental music, picked up from a radiocast, on in-visible ultra-violet rays.

After translating his collection of sounds into light flickers, Dr. Stockion point by an ordinary radio recelving set without a radio frequency amplifier, but the crystal or vacuum tube detector was replaced by a

The flickering light passed through a small window in the slivered photo-electric cell and thereby caused a pulsating current to flow. Invisible motion pictures transmitted on like rays were thrown on a screen and another important feature shown was that of nonglaring headlights on automobiles thrown on the street of headlights on automobiles, thrown on a miniature road covered with a fluorescent substance from a car painted with a phosphorescent substance which glowed even after the invisible rays had been removed.

Yale Laboratory Is Solving

Problems in Physics Field NEW HAVEN, Conn., Jan. 15 (Special)-Yale natural scientists have opened an attack on problems in the field of physics which promises to bring important results, it became known here today, when the univer-sity made public a report on the research activities being carried on in the Sloane Physics Laboratory. Some of the investigations, the report shows, have been completed and will be the object of widespread

Prof. William F. G. Swann, director of the Sloane Physics Laboratory, has a number of important investigations in progress. In Sep-tember last he took nearly two tons of apparatus to the top of Pikes Peak. Here, and subsequently at Colorado Springs, he carried out in-vestigations on the cosmic rays, and secured data which, when taken in conjunction with experiments being carried on at Yale, will permit a cal-culation of the extent to which these rays are absorbed in the atmosphere. Professor Swann has also under

Professor Swann has also under way the development of an apparatus designed to secure potentials of the order of 1,000,000 volts. Such an apparatus will render it possible to give to electrons velocities com-parable to those attained in the nu-cleus of the atom and so permit an attack on several important prob-

lems of atomic structure.

On the side of mathematical physics he has recently completed an investigation to show that terrestrial magnetism, terrestrial electricity, and graviation may all be harmonized, as the outcome of harmonized, as the outcome of a slight modification in the laws of

the earth.
Prof. John Zeleny is continuing his investigations upon the nature of the discharge in vacuum tubes contain-ing gas, a field in which he has been one of the pioneer workers. The re-cent interest in this field has added a new importance to the work of Professor Zeleny's, which has remained so far unpublished, but which appears to contain the key to many of the developments now in prominent discussion

Various other important investiga-tions of a highly technical nature are progressing.

ASKS FOR AMITY

Mexican Scottish Rite Appeals for American Understanding and Friendship

MEXICO CITY, Mex., Jan. 15 (Special)-A plea "for co-operation and helpful assistance, so as to give the annexes of eight Roman Catholic the American public the truth about churches, including the sanctuary of Guadalupe at Guadalajara, has been working of the Mexican Government" is contained in a resolution adopted at a special meeting of the Supreme Council, Thirty-third Degree Scottish Rite Masons, of the Jurisdiction of Mexico.

Jurisdiction of Mexico.

It is being sent to Leon Abbott, Sovereign Grand Commander of the Northern Jurisdiction, at Boston, Mass., and to John Cowles, Sovereign Grand Commander of the Southern Jurisdiction at Washington, as well as to subordinate bodies in the Mexican Republic.

The resolution declares that

are tense, citizens of both coun-tries are in perfect friendship com-mercially and socially and concern is expressed over the maintenance of prosperous trade relations if the diplomatic controversy continues. The resolution charges that Adolfo Diaz, President of the Nicaraguan

which "naturally do not represent the genuine interest and opinion of the American people at large." It also blames these groups with trying to make Mexico appear responsible for the trouble in Nicaragua.

The resolution concludes: "We ask you to try to persuade the representatives of the American people to do justice to the Mexican people and spread a peacemaking influence abroad, in order that both countries may continue in the bonds of friendabroad, in order that both countries may continue in the bonds of friendship and the true spirit of brother-hood and mutual confidence, so that we may appear to the whole world as examples of friendly nations upon the American continent, working for the establishment of the universal brotherhood of man throughout the

Hopeful View of Situation

Is Taken in Mexican Capital MEXICO CITY, Jan. 15 (AP)-Mexican official circles believe that the situation is improving, both as regards international relations and domestic disturbances. This view, however, is not universally shared

Some observers continue to see dubious if not dangerous possibilities. The view of the Mexican officials is based in part, on Senator Borah's speech in the United States Senate, urging the adoption of a new Latin-American policy by the United States and arbitration of the dispute grow-ing out of Mexico's petroleum and land laws, some features of which the American State Department has

denounced as retroactive and con-fiscatory.

Optimism was also aroused among officials by the War Department's assurance that federal troops were

in a position to suppress all the bandits and rebels, who have been increasingly active of late. Conversion into public schools of

POINCARE GIVEN BIG MAJORITY

Vote of Confidence Carried in French Chamber-Premier Curbs Oratory

By SISLEY HUDDLESTON

By Special Cable
PARIS, Jan. 15-After the agitation and polemics inseparable from the French senatorial elections and ances. nomination of presidents of both cant that the Poincaré Government, facing the Chamber of Deputies and stating its program, should receive a vote of confidence of 365 against 182. This large majority is reassuring, It is not likely that Parliament will interfere with Raymond

incaré's task. In spite of the ingenious methods of counting, the gains of the Left in the Senate were few and were St the senate were spense of the Radi-cals. Theoretically the Left should have won many more seats. The electors are local councilors and depu-ties who themselves were elected two years ago. They should have mustered automatically a considerable majority for the Left. In fact they did not, thus showing that even in the restricted circles of electoral colleges, the need for continued na-tional union is realized.

Socialist President of Chamber The Chamber certainly chose Fernand Boulsson as president for 1927. It is the first time that a Socialist has been placed in that post, which ranks in French hierarchy as the third in dignity. But M. Boulsson has the true qualities of chairmanship and immediately made it clear that he would not act as a partisan. The Senate chose as president, that is to Senate chose as president, that is to say the second person in the Repub-lic, Paul Doumer who is notoriously lic, Paul Doumer who is notoriously moderate, and he was particularly opposed by the Socialists when he was Finance Minister. Altogether therefore, the sighs of a fruitful and untroubled, session would be good were it not that the rumors concerning the differences of opinion between Aristide Briand and M. Poincaré persist. Indeed Edouard Herriot is said to have ranged himself entirely with M. Poincaré and M. Briand is not enthusiastically supported now, even in such newspapers as is not enthusiastically supported now, even in such newspapers as Quotidien. M. Briand wished an im-mediate debate on foreign policy but twice ministerial council decided,

German Tactics Unhelpful M. Briand will, however, be heard by the senatorial commission. The ern fortifications are not calculated ern fortifications are not calculated to strengthen M. Briand's hand. After procrastination General von Pawels has been obliged to submit his proposition in writing, but though the Qualt d'Orsay is inclined to put the most favorable interpretation on them, it is understood that Germany eans to keep its substantial forti-

as determined as ever to exclude verbosity. He will allow only one day a week for interpellations and discussions on them. The rest of the time is to be devoted to business. M. Poincaré declares that deeds are preferable to words. Mr. Bium in-sisted on debates, asserting that the political life of the Chamber had been suspended and that the depu-ties were gagged.

been suspended and that the depu-ties were gagged.

The Premier retoried that oratory would not solve problems like the high cost of living and unemploy-ment. The Chamber overwhelmingly approved this view. M. Poincaré promised that during the session he would consider electoral reform, military service and social assur-ances.

parliamentary houses, it is signifi- AMERICA CANNOT GRANT REQUEST

Objects to Expressing Its Views on the Economic Aspect of Disarmament

By Wireless

GENEVA, Jan. 15-No surprise has been caused in League of Nation circles at the announcement of the United States Government, made through Theodore Marriner of the Berne Embassy that it could not comply with the request for a detailed statement of its views on the joint committees' report regarding cereconomic aspects of disarmament before December 31. The joint

should put in a caveat regarding the Social Demotindings of this body. Hugh Gibson, American Minister to Switzerland, indeed made it clear at the time that, although he had no objection to the Joint committee being consulted, he would not be bound by its decisions. As a matter of fact no government is bound by its decisions which are in the nature of recommendations.

Mr. Gibson also pointed out that the United States would have preferred a special committee of ex-

ferred a special committee of ex-perts instead of a joint committee which is an appendage of the League. The conclusions of this body to which the United States takes exception are those, it is said, referring to the possible conversion of dye, chemical and other factories to war purposes and the comparative time taken in each case.

In this connection the United States Government, it is thought, detects the danger that an element of supervision of interferance with business might creep in, especially in connection with factories having important secrets to guard. The Christian Science Monitor's repre-sentative is informed that the joint committee does not share this view, and believes that the conclusions would not have been so closely scanned at Washington if American A short clash in the Chamber be-tween M. Poincaré and Leon Blum, cept the invitation to attend the Socialist leader, revealed M. Poincaré, meetings.

UNDER CHARGES Accusation That Legation Officials Engineered Raid

HUNGARY AGAIN

on Socialist Premises By SISLEY HUDDLESTON

By Special Cable PARIS, Jan. 12—Further extraor-dinary allegations are being made against the Hungarian Government. After the recent fraudulent banknote brication, involving the highestplaced persons, there comes the cials organized at Paris the theft of important documents from the offices of the Hungarian League of the

Count Michael Karolyi, the president, announced the fact and pro-ceeded with an investigation. Finally a statement was issued ac-cusing the authorities of having organized a raid, employing a poor emigrant, Vertes Aspad, to seize cer-tain papers which were taken to the tain papers which were taken to the Hungarian legation where he was duly recompensed.

These circumstances are related in

what purports to be a confession by Aspad. Certainly the statements should be received with reserve, but whatever he the truth, it would appear that Count Karolyi and the French members of the League of the Rights of Man intended, if posscandal.

Among the documents were confiment before December 31. The joint dential reports, a list of the mem-committee is in reality the League's bers of the Social Democratic Party. economic committee with certain additional experts, and the United ditional experts, and the United States is not represented.

It is felt, therefore, that it is quite reasonable that Washington the Government to compromise the should put in a caveat regarding the findings of this body. Hugh Gibson, American Minister to Switzerland, maintain so-called criminal relations indeed made it clear at the time that, with traitors.

Inquiry at the Hungarian Legation elicited a flat denial of the asser-tions that members of the legation had encouraged the robbery or had Baron Koranyi, the Minister, affirmed that he was totally ignorant Koranyi, the Minister

BRITISH INDUSTRIAL PROFITS 6.3 PER CENT **GREATER THAN IN 1925**

By Wireless from Monitor Bureau LONDON, Jan. 15—Despite the general strike and coal stoppage, the aggregate industrial net profits here last year actually exceeded those of 1925 by 6.3 per cent. This remark-able fact, which is full of encouragement for British trade, emerges from typical industrial companies pur

ain's leading financial weekly. The Economist divides these companies into three groups, namely those concerned with iron, coal, stee and textiles, which lost heavily; those interested in such overseas undertakings as oil, rubber and tea, which did so well as more than to make up the balance, and other con-

cerns which show comparatively little change.

The profits were lowest in the third quarter, after which the recovery commenced, though those of the fourth quarter were still much below what was made in the first and

He carried to India, a Chinese students' invitation to Mahatma Gandhi, to visit China next year.

He saw Gandhi at Ahmedabad where he was told this invitation would be accepted. He was much struck with education work Gandhi is now doing among indian students, and thinks he could make a "unique contribution of the solution of contribution of the solution of Chinese difficulties at the present

ANTI-EVOLUTION LAW IS UPHELD

Tennessee Court at Same Time Reverses Judgment in Seopes Case

Ru the Associated Press NASHVILLE, Tenn., Jan. 15-The the constitutionality of Tennessee's famous Anti-Evolution Law, but at teacher who was convicted of violat-

ality of the law was by a three to one vote, but all agreed that as the jury which convicted Professor Scopes did not fix a fine, the trial judge, John T. Raulston, had over-stepped the bounds of the law in assessing a \$100 fine against Scopes. Under Tennessee law, it was pointed out, a fine in excess of \$50 may be

assessed only by a jury.

The decision, announced by Chief Justice Green, stated that the only that nothing is to be gained by proand suggested to the attorney-general that the Scopes case be nolle

The opinion declares it seems plain that the Legislature only intended "to forbid teaching that man descended from a lower order of anidenying the Bible story of creation restricted by the caption and by

the constitutionality of the act, com-mented upon its "uncertainty of meaning" and quoted a United States Supreme Court decision in the case of Connally vs. the General Construction Company, to the effect that laws must be "sufficiently explicit to inform those subject to it what conduct on their part will render them liable to its penalties.'

NEW YORK, Jan. 15 (AP)-The de cision of the Tennessee Supreme Court upholding the constitutionality of the Tennessee Anti-Evolution Law in its ruling on the Scopes case, will be immediately appealed to the United States Supreme Court, Dudley Field Malone of defense counsel announced.

NEW EDITOR FOR "MOTORSHIP" By Wireless from Monitor Bureau LONDON, Jan. 15-The announce ment is made of the appointment of A. C. Hardy as editor of "Motorship," a leading American marine magazine. Mr. Hardy has written six books on shipping. He served a five-year apprenticeship with a building company at Jarrow-on-Tyne, prior to taking a naval architectural course at Armstrong College, Newcastle-on-Tyne, where he gained a bachelor of science degree. At intervals he shipped on long voyages, gaining both deck and engine room experi-ence. The first visit he made to America was as a carpenter's mate.

President von Hindenburg would rather see a government in power which leans toward the Right when dissolution takes place. Though he is endeavoring to be impartial, it is evident he is paying considerable attention to the advice given him by the Right parties. Thus he had a long private intimate conversation with Count Westerp, leader of the German Nationalists last night, of which, however, no mention is made in the press.

ENGLISH EVANGELICAL CLERGY OPPOSE CHANGE IN PRAYER BOOK

Hundreds of Church of England Ministers March to Lambeth Palace to Present Memorial Against Proposed Revision

By Wireless from Monitor Bureau | cite church law with the practices R. G. Bowring and Henry Fowler of the League of Loyal Churchmen, an organisation claiming to represent some 500 evangelical ministers of the Church of England marched in a procession to Lambeth Palace and prebury a memorial protesting against the proposed prayer book revision as tending to the "undoing of the work of the reformation." The question of revision has been proceeding many

The Archbishop of Canterbury and Church of England bishops to pass the final draft for presentation on Feb. 7 to the General Convocation of ments between Italy and their respective countries. The visits of the Hungarian and Rumanian statesmen assume considerable political importhe Church of England clergy. This draft has not yet appeared, but it is understood to make the reservation of the sacrament and other Anglo-Catholic practices optional under certain circumstances, instead of being as at present entirely contrary to the established church law.

The evangelical clergy are greatly perturbed at what they regard as re-introducing into the church ritual deeply significant features of Roman Catholicism. The procession was a gesture from the "stand-pat" Protes-tants who hold that if the prayer book is revised such revision means a move toward Rome. Anxiety is not confined, however,

to the extreme evangelical section. Capt. J. W. M Barron, secertary of the Church Association, an organization claiming to have the support of two-thirds of the entire body of the Church of England, interviewed by a representative of The Christian Science Monitor, said that the issues raised were of the utmost gravity. The bishops are endeavoring, the

Monitor representative understands, to find a compromise, but their posi-tion is difficult as they have to recon-Old Ship Pictures

LONDON, Jan. 15—A deputation of clergy and laity, headed by the Rev. E. G. Bowring and Henry Fowler of The Times thus recalls a statement made by the Bishop of Dur-ham last November, when he told the diocesan conference that "in the interests of law and order some things which evangelicals dislike may have to be legalized." Presiding at the

Islington clerical conference, the Rev. H. W. Hinde, rural dean, said in view of the doctrinal deviations permitted by certain bishops, there must be controversy.

Regarding the threatened secession from the church, however, Dr. Francis J. Chavasse, ex-Bist Liverpool, said that "secession the Archbishop of York were present at a session attended by 34 be a blunder and a sin. The Anglotive understands, are not inclined to modify the demand they have made raised the question of disestablish

TAX EXEMPTION

Proposal for New Industries a Topic at States Officials Meeting

MANCHESTER, N. H., Jan. 15 (Special) — Arguments for and against tax exemption to new industries were brought forth at the meeting of New England state tax officials association.

William F. Howes, industrial agent for Manchester and member of the New Hampshire House of Representation.

for manchester and member of the New Hampshire House of Represen-tatives, was the principal speaker in favor of legislation permitting local option on the matter. Zenas W. Bliss, Rhode Island tax commis-sloner, spoke against the enactment

ing of a bill on the subject which will be introduced to the Legislabtain only the desired element and ot "fly by night" corporations.

emption to new industries. He doubted if tax exemption would at-tract sound business enterprises IDEA DISCUSSED and went on to state the advantages needed in a city to bring in indusneeded in a city to bring in indus-

Among these he mentioned rail-road facilities, short hauls to ship-ping points; amusements and other forms of diversion for the workers as well as educational facilities, all of which, he declared, would suffice to overcome any advantage gained by tax exemption

Mr. Bliss said this method also creates competition between cities from which no good comes. Rhode Island has had tax exemption on local option, he declared, but its past experiences have caused the asses-sors practically to abolish it.

A method of arriving at the valuation of property by means of an equalized value, whereby all property will be measured by the same rule, was advanced by William F. Connolly, assessor for Bridgeport, Conn., and former professor of political economy at New York Injuratity. of such a law.

Conn., and former protects the framcal economy at New York University.

Henry F. Long, tax commissioner

will be introduced to the Legislature. He told the tax commissioners
the idea was closely allied to the
plan of obtaining new industries, rate on net income. He pointed out
and asserted it was the intention to
that subsidiary companies had inhave a bill permitting local option creased their gross sales in Massa-and containing certain provisions to chusetts to \$10,000,000, but they were paying on a net income of \$36,000. An attempt is being made to devise Bliss told of experiences in some means of taxing the parent Rhode Island as a result of tax ex- company, he said.

SWIFT RIVER VALLEY TOWNS SEEK DEFINITE SAFEGUARDS

Residents in Water Project Area to Propose Several Important Amendments to Legislative Bill

Greenwich and Pelham, where lands mittee will be asked to give a hear-are to be flooded extensively by the lake to be created to augment the metropolitan water supply, and the Swift River Valley Protective Association have agreed upon a program to be supported at hearings soon to be given before a legislative com-mittee in Boston on the special com-mission's bill designed to govern the

employees of manufacturing industries in the valley.

ries in the valley.

In the first place, residents of the valley want a clear definition of what shall constitute damages under the provisions of the bill and what means of recovery shall be afforded.

The question of when damages shall be noted also is regarded as imporbe paid also is regarded as impor-tant. Under the bill as drawn, pay-ment would not be made until the land is taken over, and no date is set

or taking the land.

More definite provisions for relocation of the Athol branch of the Boston & Albany Railroad and the relocation of public highways are desired, and more liberal compensation for workers who will be thrown out of employment by the flooding of territory. The question of whether pub lic property of towns to be virtually wiped off the map should go to the State or be divided pro rata among the towns taking over the remnants

Four ways of potential conserva- all of which are in successful com-

neering at the Massachusetts Institute of Technology.

The methods proposed are: Obtaining more gasoline from the crude
by development of present methods; further cracking can be forced These cracking operations represent, therefore, an insurance against inadequate gasoline supply as our crude resources begin to fail and offer a potential method of petroleum conservation which will come into more active operation the moment the economic situation justifies this more intensive unit."

It must also be remembered that cracking equipment differs from most other refinery equipment in that its expense is much greater and its capacity much less, Professor Lewis said. That is, the investment is tied up in the manufacture of cracked. alarm the public," he said, "be- gasoline is far greater than that necessary for obtaining the straight-run gasoline present in the original crude as such. Furthermore, the farther one attempts to increase yields from the crude, the greater this discrepancy becomes.

As to the second point in gasoline conservation, Professor Lewis said tetræthyl lead has been found to stop detonation or knocking in the engine and adds to the 5 per cent of the fuel energy of the gasoline ordinarily obtained

Coming of Diesel Engines. Points three and four are closely linked together so that Professor sene can be used in fractions in motor fuel, he said, and can be used entirely in Diesel engines, which Professor Lewis predicts will be as common five years from now as the automobile was in 1910. Diesel engines are so constructed as to be able to use kerosene.

Although tetræthyl lead was dis-covered in 1852, it was not developed until 1919 for use in gasoline, Professor Lewis said. While both it and benzol, another chemical of like qualities, are both toxic, when used in mixtures of gasoline, they would save the Nation's consumers \$500,-000,000 a year. The United States now pays about \$1,600,000 for 200,-000,000 barrels a year, he said. With the knock eliminated gasoline con-sumption could be reduced a third.

cutter race and ski-joring, and provides a continuous round of winter PROHIBITION EXERCISES HELD

Unlike the usual type of carnival, Unlike the usual type of carnival, however, this one is regarded in the nature of a permanent investment for the youth of the community. Because it was felt that better facilities should be provided for the winter play life of Claremont children, the Outing Club and the Chamber of Commerce had constructed on the community playground in the center of the town a speedy topogran chute good time.

Claremont people also raised \$3000, with which they bought a nearby hill and built a splendid ski-jump which, according to Dick Bowler, former Dartmouth ski jumper who recently tried the jump, is one of the best in New England.

Realizing that—as too often hapins at winter carnivals—many enusiastic visitors are merely spectors unable to take an activate of the various and the conditions of the various are merely spectors.

Making law observance respectable is the real problem of today, said Gov. Ralph O. Brewster this noon at the Congress Square Hotel at a too stanaster for the day, commended him as a fearless official who placed public duty above all of other considerations.

The luncheon was attended by hundreds of temperance workers from various parts of Maine. Althea G. Quimby, state president, in introducing Governor Brewster as too stanaster for the day, commended him as a fearless official who placed public duty above all of other considerations.

Percival P. Baxter of Portland, former Governor, was introduced the seventh anniversary of national prohibition.

The Governor said a requisite produced the various and the conditions of the seventh anniversary of national prohibition.

tators unable to take an active part in the various sports, every effort will be made at this carnival to teach visitors the use of skis and snowshoes. These will be provided in large numbers and competent instructors of the Outing Club will offer their services to whose year way desired.

It is declared by the carnival officials that the occasion is to be a community affair. Claremont is make ing a permanent investment and de-sires that anything savoring of com-mercialism be avoided. The town will keep open house and every effort will be made to insure visitors a genuine welcome.

Governor Brewster urged Maine people to keep in mind that their State was the pioneer in the national prohibition movement. He recounted some of the experiences of Neal Dow, whose life he classed as "an epic in the struggle to make men free." New Hampshire Federation Takes Stand Against Proposed Modification

> CONCORD, N. H., Jan. 15 (Special) New Hampshire farmers, members of the new Farm Bureau Federation, outlined their legislative program today in a series of resolutions, many of which were passed after heated debate.

The membership favors a three cent gasoline tax, a portion of which revenue is to be turned back to the towns for local road maintenance. The Governor said a requisite to progress of good government was the "development of a public sentiment which shall make it more popular to speak of law observance than of law violation." He pointed out that "the laster, he has gained the opinion of highways.

Baxter, he has gained the opinion of the world in the behalf of the plans of the print of the p

continuance of the mill tax plan for the state university, more money for the bureau of markets, continued state support for extension work. against compulsory automobile in surance and in favor of continued and increased support for the state publicity bureau.

George M. Putnam, president of the federation, declared that recent conferences with representatives of the largest power companies in New Hampshire, have brought out their apparent willingness to co-operate and their desire to see power lines running into all the rural sections

of Organization at Amherst

of the State.

Although the details of the joint plan have not been finally agreed on the farmers are to demand that lines. to meet the expense of its construc-tion in three years, that rural sections therefore get the benefit of the urban rate, and that the construction of a line be started immediately fol-lowing the meeting of certain set re-quirements by the rural people. Mr. Putnam declared that a propo-

Mr. Putnam declared that a proposition offered by the company that it would build a considerable mileage of lines free of costs had been turned down, on the ground that the farmers want no gratuitous favors from power interests, but rather a plan of operation that will be definite and applicable to all.

NEW FEDERAL BUILDING PROPOSED FOR BOSTON

A new 12-story federal building for Boston to cost \$7,000,000 and stand on the site of the present structure in Post Office Square, is proposed in a bill introduced in Washington by George Holden Tinkham (R.), Repre-

New Fashions That Herald Spring

TIERS, FLOUNCES and TUCKS ON DRESSES!

\$25 to \$250:

(Fourth Floor)

THE new spring fashions are more femininely lovely than ever, developed in fascinating prints and bright colors, blackand-white, black-and-color, all white, roseleaf, beige, and the new blues. Sports dresses for spring feature light-weight wool jersey and wool crepes combined with silk, and imported tweeds in plaided effects. Afternoon and dinner dresses are fashioned of crepe satin with both dull and lustrous sides used for contrast. Emphasis is placed on chiffon combined with lace for more formal hours. You will find in our advance-spring collection such new style features as lavish tuckings, bolero effects, low waistlines, surplice closings, tiers, scallops, flounces and metal-thread or colored silk embroideries.

0

WOMEN'S KNITTED SUITS \$25 and \$29.50

(Sweater Section, Third Floor)

NEW light-weight knitted suits for southern wear have just been unpacked, featuring light-weight closely knitted jersey jacquette suits in white, orchid, tan, powder blue, and silver, \$25; and rayon-and-wool slip-on suits in shell pink, Nile green, powder blue, and white, \$29.50. Both models have the fashionable kick-pleat skirts. The jersey suits come in sizes 38 to 42. The rayon-and-wools come in sizes 36 to 40.

"Here it is," Mother answered, and down she set it, pot and all, in the laundry tray, being ever so care-

and then.

Progress to the Churches

Rurel Church Union

Rurel Church Union

("Once the desire for church union has developed in a community, it has persisted," writes Robert W. McCullech in summins up for the Survey an exhaustive study of the subject of rural church union. Mr. McCullech points out that the movement toward community churches is not to be regarded as an expression of rebellion against denominationalism, but as a frank effort to harmonise competing elements which had in many cases resulted in the failure of churches and church work.

Although there are 977 united rural churches, there is so far to be found very little conterned among them, each being found to be more or less of an entity in itself. There were reported, how-

preached his first extempore sermon. He had forgotten to bring his manuscript, and for the moment was greatly disconcerted. A woman member of the congregation counseled him to rest upon the assurance that "the Lord will provide," and he had such success with his extemporaneous effort that it is said he never again took a manuscript into the pulpit.

"Do they really?" Dorothy questioned in surprise.

"Yes, the leaves of plants have little openings all over the surface so that they can get air, and that is of preservation

the instructor, and flown. It want to fly," said the Miniature Air-

ever, 491 united churches where one or more of the merging elements relinquished denominational allegiance in order to affiliate with another denominational activity.

Among the significant points stressed by Mr. McCulloch none is more outstanding than the disclosure that "the greater number of unions were formed by lay leaders, men and women with no very intimate knowledge of the practices and viewpoints of overhead denominational organisations. He adds!

"As might be expected, the constitutions drawn up to meet the local difficulties in ways satisfactory to the local people, contain provisions that trained denominational leaders will find novel, to say the least.

"Many of them provide for receiving members without exacting adherence to any denominational octrine or submission to any denominational rite. Bome accompilish this by having associate members, often with full voting power. Generally the forms of worship prescribed are those common to the denominations represented, with all sorts of compromises provided to cover inconsistencies in the different usages." Regardless of the type, united.

days, her mother gave her a few little tasks early in the morning and then she was free to romp and run.

And one of the tasks she had was really just as much fun as play, so that she always looked forward to Saturday for this very reason.

It was so interesting that perhaps you will want to do it, too. It was to give all the plants that were kept to the house a bath and shampoo!

Wash every the began sprinkling which a shampoo, too," her mother laughed, "because if you will find that this plant has very fine hair on its leaves."

"So it has!" Dorothy had not notions and problems appointed six upper classmen to act as a committee on university student investigation and research together with six others to be chosen by them, and make a written report of some length.

The six seniors met yesterday to

written report of some length.

The six seniors met yesterday to select the six junior members but deferred action until next week when they will confer with Dr. Boardman regarding future action. They are Clare H. Brown of Staten Island, N. Y., and Robert F. Scott of Old Town, representing the Cellege of Technology; Cyril G. Cogswell of Old Town and John H. Mahoney of Elisworth, representing the College of Art and Sciences; Henry O. Trask of Mechanic Falis and Raiph J. Swift of Thomaston, representing the College of Agriculture.

Dr. Boardman said he stands ready to co-operate in every, reasonable and

Dr. Boardman said he stands ready to co-operate in every reasonable and proper way. "I firmly believe," he said, "that many problems of the university with which the students are closely associated, in order to reach a solution must be studied by them and be solved by them. It appears that most sympathetic relations can be attained between students and teachers, and between students and the administration, by some such activities."

"Here it is," Mother answered, and down she set it, pot and all, in the laundry tray, being ever so careful not to bend or break the lovely long fluffy leaves of the fern.

Then Dorothy began to eplash and sprinkle water all over it, with a little aprinkling can she had for this purpose.

"Make it like a gentle soft rain," her Mother suggested. "It likes to feel the water trickling down into the pot to moisten its roots and give it a nice refreshing drink."

"May I wash the big geranium plant we keep in the living room window next?" Dorothy asked.

"Yes, it needs a bath very much,"
Mother answered putting this plant with its lovely red blossoms down it to the trays.

"My, but its leaves are dusty!"
Dorothy exclaimed.

"Plants breathe through their leaves," said Mother. "so it is the lovely." RAIL MEDIATOR TO BETURN G. Wallace W. Hanger of the United States Mediation Board at United States Mediation Board at Washington will return here Tuesday, in accordance with the Raliway Laber Act provisions, to act again in the controversy between the management of the Boston & Maine Raliroad and its engineers and fremen, over extension of passenger service runs.

Peramublators Named 200 Years Ago to Survey Property Lines

Special from Monitor Bureau NEW YORK-An interesting docu-Arthur W. Brandt, commissioner of highways of New York, said that laws should be so written that awarding officials can require, in addition to a bond, the authority to investigate the contractor from standpoint of experience, equipment, organization and financial condition.

Frank T. Sheets, chief highway engineer of Illinois, urged that contractors themselves do more to make questionable practices impossible in the industry. Banks have been too liberaf to some irresponsible contractors, he stated.

Need of having a trained soil engineer attached to every state highway department to advise on every road to be built was urged by Prof. F. H. Eno of Ohio State University.

engineer of Illinois, urged that contractors themselves do more to make questionable practices impossible in the industry. Banks have been too liberar to some irresponsible contractors, he stated.

Need of having a trained soil engineer attached to every state highway department to advise on every road to be built was urged by Prof. F. H. Enc of Ohio State University.

SCOUT FOUNDATION

OVERCOMES DEFICIT

Special from Monitor Burceu
NEW YORK, Jan. 15—The Boy Scout Foundation of New York has overcome an initial deficit of \$50,000 and increased its membership from 18,000 to more than 28,000 during the last four years, according to an nouncement by Franklin D. Roosevelt, who has just been elected president of the foundation for the fifth consecutive year.

"In spite of increasing administrative costs in every public work, including federal, state and municipal governments, as well as private enterprises." Mr. Roosevelt said, "our

Tree from debt."

Mr. Roosevelt referred to the report of the committee on scholarships and awards, saying that one four-year scholarship to the New About Vork University had already been awarded and three other Scouts would receive scholarships later on in the year.

A Paris Causerie

By SISLEY HUDDLESTON

To solly this month that the Boulevard Haussmann, one of the main streets of Paris, has been demolished, and the President of the Republic inaugurated the belated fulfilment of an extraordinary conception.

It is possible that this event, which is certainly not negligible, will have considerable influence on the direction of Paris traffic. Will it on the contrary to complete it. The original purpose was to construct an unbroken thoroughtare from the Boulevard Montmartre, by the rue Drouot, to the

it continue to flow along the Grands Boulevards tumultuously toward the Madeleine? Will it, on the contrary. martre, by the rue Drouot, to the Place de l'Etoile. Only a small group of houses prevented the junction. To the north lay a region of high-class stores, important business offices, good hotels, and the Gare Saint-Lazare.

Madeleine: Will it, on the contrary, be diverted toward Saint-Lazare and the Etoile? At any rate, a new opportunity is given to the inveterate grumblers, who dislike change even when it is improvement, to declare once more that the Boulevards, as they knew them, have caused to be donce more that the Boulevards, as they knew them, have ceased to be.

Around the Gare Saint-Lazare is the Quartier de l'Europe where the streets are named after the capitals of Europe, and the Batignolles, a more mixed quarter. Here are the Galeries Lafayette and the Magasins du Printemps. Poets like Stéphane Mallarmé, musicians like Chopin, novelists like Dumas and Zola, painters like Manet, the forerunner of the Impressionist school, are assistant once more that the Boulevards, as they knew them, have ceased to be. They dislike the rivalry of the Boulevard Haussmann, though if indeed traffic flows along the Boulevard Haussmann, instead of to the Madeleine, the present congestion will be relieved and more space will be given to the traditional Boulevard life to revive and flourish. In any case it is foolish to oppose the modern movement toward the west.

Shafts of Light and Air

novelists like Dumas and Zola, painters like Manet, the forerunner of the Impressionist school, are associated with this district. In it is the Conservatoire Nationale de Musique et de Déclamation, with its instruments once used by Lulli, Sarasate. Meyerbeer, Méhul. Ambroise Thomas, Beethoven, Paganini, Mendelssohn, Verdi and Offenbach. For over a mile and a half the broad boulevard runs westward skirting the Plaine Monceau, a fashionable residential district, and then changes its name to the Avenue de Friedland, which leads to the Arc de Triomphe. A Remarkable Artery

It is truly a remarkable artery, and the Paris authorities, with their notions of town planning, have been grieved that it was, not joined up to the Grands Boulevards, which lead eastward to the Bastile. Only a few houses and shops separated

RESISTANCE **B-D PROBLEMS** DISCUSSED

Helpful Hints on Useful Changes Are Given by Service Man

some notes on the operation of a resistance-coupled audio amplifier in nction with the B-D set may prove interesting to Monitor read-ers. A service man who recently serviced a set of this type gives the following data:

Soliowing data:

Upon testing out the set it was found that several peculiar conditions prevailed. First, the set could not, be satisfactorily neutralized. Second, the action of the tickler coil connected in the plate circuit of the detector tube was very erratic and unstable. Third, the set exhibited a unstable. Third, the set exhibited a peculiar lag characteristic which was only noticeable when the resistance-coupled amplifier was in use. The sudden changing of the tickler control or of either of the tuning controls caused a temporary increase of volume which subsided to a normal value in a fraction of a second after the change of dial setting took place. Fourth, the quality of tone on strong signais was very poor indeed.

very poor indeed.
On testing this set with a transformer-coupled amplifier it was found to exhibit none of the peculiar characteristics mentioned. In fact it was a perfectly well behaved B-D set. After spending considerable time and thought on the problem it was found that the reason for poor tonal quality and erratic tickler con-

tonal quality and erratic tickler control was due to a very low plate voltage on the detector tube.

If the usual detector voltage of 22½ or even 45 is applied to the detector binding post, by the time the current supplying the detector plate

Portland Puts Ban on Radiating Sets

Portland, Ore., Jan. 15
A T THE request of radio fans, the city council has passed an ordinance providing that no volet ray, X-ray or other electric devices causing high oscillations may be operated between 7 and 11 p. m. within the city. The ban includes regenerative radio receiving sets. The ordinance is as an experiment to reduce interference with radio recention.

lation with a "plop." Also the tickler knob had to be turned back several degrees before the tube would stop oscillating. A negative grid return remedied this trouble. These changes remedied conditions 3 and 4.

changes remedied conditions 3 and 4. The neutralization of the set followed without further trouble.

It was found by analysis and experimentation that the lag effect mentioned was due to the comparatively slow charging or discharging of the coupling condensers in the resistance-coupled amplifier. It was shown by substituting small condencers, of from .00025 to .001-mfd. for the .01-mfd. or larger condensers, built into the amplifier, that the lag effect was the slow charging and discharging mentioned.

charging mentioned.

Of course the substitution of the smaller condensers spoiled the tonal reproduction of the amplifier but served to prove the action. These large condensers act like palls of water on the surface of which are ripples. These ripples correspond to voice and musical vibrations. When one of the controls is changed suddenly the amount of charge in the condenser, or water in the pail, is increased or decreased in amount. These sudden disturbances in the water level in the pail of water cor-

respond to the momentary changes in volume in the loudspeaker. Another slight improvement in tone current supplying the detector plate that passed through the plate resistance of the resistance-coupled amplifier, there is only about 3 or 4 voits on the plate of the detector. The remedy was to use from 67% say after making these changes on the second resistance of the detector post. This worked nicely, except that the tube now wanted to go into oscil-

Prepared for The Christian Science Monitor

The map is plotted for the latitude of Southern Africa and Southern Australia, but will answer for localities much farther north or south. When held face downward, directly overhead, with the "Southern Horizon" toward the south, it shows the constellations as they will appear on Feb. 6 at 11 p. m., Feb. 21 at 10 p. m., March 2 at 3 p. m. and March 23 at 3 p. m. in local mean time. The boundary represents the horizon, the center the zenith. For convenient use, hold the map with the boundary down corresponding to the direction one faces. The lower portion of the map thus held shows the stars in that part of the sky according to their relative heights above the horizon. The names of the planets are underscored on the map.

The February Evening Sky for the Southern Hemisphere

Many of the bright stars are now past the meridian. Sirius of Canis Major, Canopus of Carina and the brilliant setting of Orion are verging to the west. Aldebaran, the faithful "Follower," closely pursues the Pleiades to the horizon. From Orion, the sinuous form of Eridanus leads us to Achernar. Mira in Cetus leads us to Achernar. Mira in Cetus is just disappearing. Toward the north Canis Minor and Gemini are conspicuous. The shining band of the Milky Way starting from the northwest near Capella cleaves the sky through the zenith to the southeast. "This gorgeous arch with golden worlds inlaid" enmeshes the flaming stars of the Southern Cross and Centaurus. Beneath the Cross faming stars of the Southern Cross and Centaurus. Beneath the Cross we may see the black blot known as the Coal-Sack, an apparent void. but in reality a dark cosmic cloud projected, on the luminous background of the galaxy. The eastern sky is rather bare, compared with other sections. Hydra and its attendants Coater are not as a not as other sections. Figure and its strend ants, Corvus and Crater, are not es-pecially conspicuous. Virgo rising beneath is more promising. Leo in the northeast is of striking interest as it shows the familiar form of the "Sickle." Regulus as well as Spica lies very nearly on the ecliptic, which marks the apparent annual path of the sun. The planets always travel near the ecliptic. For example, we may cite Mars and Neptune on the accompanying map. The phases of the moon, in Green-

follow: New moon on Feb. 2 at 8:54 a. m., first quarter on Feb. 8 at 11:54 p. m., full moon on Feb. 16 at 4:18

The planet Jupiter, so long an evening star, is in conjunction with the sun on March 1 and then becomes a morning star. On its way it passes very close to Venus on Feb. 5 and Mercury on Feb. 13. Mercury in the sunset sky will be seen to best advantage about Peb. 25. to best advantage about Feb. 25.
Venus passes south of Uranns on
Feb. 24. Possibly, the event will helo
some to identify the latter planet
which is on the limit of naked-eye
visibility. Mars is speeding eastward, though seen in the west as
shown on the map. It is still bright
in spite of its increasing distance.
Saturn is a morning star, but will
soon break into the evening sky.
Neptune is in favorable position for
observation, but unfortunately is far
too faint to be seen without a telescope.

ALBERTA'S HUGE COAL DEPOSIT EDMONTON, Alta. (Special Correspondence)—John E. Brownles, Premier of Alberta, has stated that with the possible exception of China, Alberta has the greatest coal deposits in the world, the production of mines within the province averaging from 6,000,000 to 6,500,000 tons yearly. The Premier placed Alberta's visible coal supplies at about 57,000,000,000 tons.

Now We Can Sit More Easily

HE discomfort of sitting for long in a Windsor or a rush-seated thair does not need to be

explained to anyone who is using any of either in the home. These types of seat have been assumed, by some people at least, as standing for the Puritan simplicity and sternness of the American forbears to whom such chairs belonged.

It is, however, a pleasure to be assured by Mr. Cornelius, in his "Early American Furniture," that these sturdy colonials din't endure as much in this respect as we may

have thought. A great many inven-tories of those mid-eighteenth cen-tury days have been found. In them

the contents of a home will be listed, room by room, giving us a delightfully intimate knowledge of the household equipment in families of many degrees of worldly wealth. In many cases cushions are among the items mentioned. Not only that, but

in several instances there are exactly as many cushions as there are chairs. Visitors to the American Wing of the Metropolitan Museum of Art will find that this bit of home comfort

such chairs belonged.

Early American Homes Supply Hartford Museum

By CARL GREENLEAF BEEDE

Pierpont Morgan, a native of Hart-ford, purchased in 1910 a large tract of adjoining land in the heart ford, purchased in 1919 a large tract of adjoining land in the heart of the city as the site of a memorial to his father, Julius Spencer Morgan. The donor's dominating love for beautiful things led to a discriminating collection of a wide range of objets d'art from many fields throughout the world. His instinct for the sethetic and rare, coupled with his great wealth, enabled him to acquire the most desirable things. The years ago a portion of these were housed in the spaclous and elegant huilding built to receive them. Ancient bronzes and glass, French porcelain, Italian majolica and glass, implies as all saxed pottery, Meissen agurines, silver-gilt metals and tworles are found in meny separate rooms. Several galleries of portralts and other cits by sighteenth and nine-teenth century artists, as well as regious minor collections are also to be seen here.

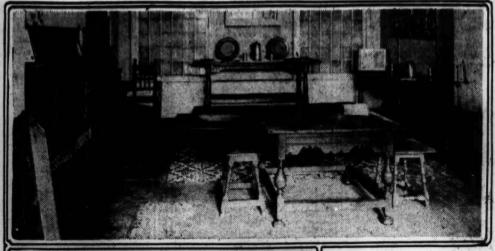

American Pottery and Furniture fost notable among these, from standpoint of the enthusiast in The large number of choice examples and Bennington pottery the Vallace Nattles cellection of ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples worthy of notice in this collection make it difficult to select single ples with its ringed turned legs is of oak unwise choice is shown by the time's wear and tear on the right front leg. Marked by the strong Dutch influence is the typical William and Mary, lowby or dressing table at the right worth are that. This surprises us by having three rectangular stretchers and sack legs of similar form. It is also peculiar in that the projecting rings of the turnings are sharp, while the common use in the sarly 1600s and between the post of the turnings are sharp, while the common use in the sarly 1600s and between the post of the turnings are sharp, while the common use in the sarly 1600s and between the post of the turnings are sharp, while the common use in the sarly 1600s and between the post of the turnings are sharp, while the common use in the sarly 1600s and between the lings Pitkin collection of parly

WHAT is probably the most complete group of seventeenth century American home furnishings is found in the Morgan Memorial at Hartford, Conn. Like some of the colonial homes themselves this is connected with a structure of much earlier date, which it far exceeds in size and dignity.

The original institution is the Wadsworth Atheneum, built in 1842 to house the paintings and statuary belonging to the Connecticut Historical Society and said to be the oldest art museum in America. J. Pierpont Morgan, a native of Hartford, purchased in 1910 a large

An Historic Court Cupboard At the extreme left stands a massive piece with heavy columns, worthy a fuller showing than it has. It represents the most ambitious work of seventeenth century furniture builders, the court cupboard. This example has a shelf below and doors above. Its practical value is little, considering the large size. The tle, considering the large size. The cupboard section and the two drawers below it give some storage space, while the low shelf and the top allow the display of pewter pottery or other useful or decorative things. Known as the Parmenter court cupboard, Mr. Nutting states that it came from the Parmenter Tavern in South Sudbury, Mass., built in 1683. There the workmen, engaged on the Wayside Inn were housed during the construction of that famous hostelry. The cupboard remained in the Parmenter family until a few years age and is supposed to have been built in 1640 or '50.

Two Examples Pictured Singly The large number of choice exam-

A Thousand Pieces

Pictured .*

CONSIDERING the comparatively short time that Americans have shown interest in ancestral home furnishings the literature on the subject reflects great credit on many of its authors. One of the sarliest and most ambitious volumes on this subject was produced in 1901 by Luke Vincent Lockwood. In this were classified, pictured and dated by Luke Vincent Lockwood. In this were classified, pictured and dated more than 800 articles. Though issued in two large volumes this work was so popular that a second edition was produced 12 years later. Now it appears in like form but with additional chapters and plates which show over 1000 illustrations of representative pieces, on pages 8"x12". Entitled "Colonial Furniture in America," its publishers are Charles Scribners Sons,

The author states that his object is to furnish a trustworthy handfind that this bit of home comfort appears frequently, a large portion of the rush- and wood-seated chairs being furnished with clashions an inch or two in thickness. These are covered with fabrics of the period and add a welcome bit of color and suggestion of comfogt. With this authority and such a precedent none of us may now hesitate long to follow a suggestion which will both brighten and soften many corners of our homes.

The author states that his object is to furnish a trustworthy handbook showing the development of style, so arranged that it will be easy to determine the age and style of a particular piece in question. Mr. Lockwood is well known for careful and thorough research which has taken him far afield in both his reading and his travel. Study of many inventories, of contemporary records and of newspapers of early dates, suggests some of the lines of original investigation followed. This has been supplemented naturally by whatever might be gained from English and Continental writers.

The reader will appreciate the ar-

Music News of the World

A Provincial in New York

Apecial from Monitor Bureau New York, Jan. 13 HE music lover from the prov-

inces who solourns only occasionally in New York is bound to be impressed first of all by the prodigious number of important muical events claiming his attention. He very quickly accustoms himself to this, and by selection finds himself comfortably entertained. What retains his interest, apart from the generally high quality of perform ance, is the surprises that await him beyond the several gates. It is generally understood that the

Metropolitan Opera Company in its present estate offers, from November to March, the best in operatic production. Everybody knows, or believes, that the Metropolitan has the finest artists, an orchestra surpassed only by the greatest symphonic organizations, a corp of conductors of high attainments and, most astonish ing of all, a chorus trained to form an integral part of the representations

pected result at every performance. They virtually did so when 'Meistersinger' was presented on the evening of Jan. 3. From the local viewpoint, the event of the evening was the return of Friedrich Schorr, admirable artist who came to Ameradmirable artist who came to America with the traveling German company a few years ago. Schorr was the Sachs of the occasion, and acquitted himself according to recollection and anticipation. His fellowyet, inevitably, the orchestra was the star. Its utterances under Mr. Bodanzky's baton were so re-vealing that more than once one rethe interruptions of the

Santuzza Redivivus There was nothing surprising bout all this. But on the afternoon of Jan. 5, the threadbare twins, "Cavalleria" and "Pagliacci," were exhibited at a benefit performance. One went with no anticipatory thrill whatever. Mme. Jeritza, it is true, was cast as the Santuzza; but the opera remained only "Cavalleria."
But this was underestimating, as it proved, the transmuting power of a great actress. Perhaps too much emphasis has been placed on Mme. Jeritza's gifts of showmanship. We have heard a great deal about her acrobatic accomplishments, and inhibited at a benefit performance. One acrobatic accomplishments, and in-deed her fall down the church steps on this occasion was a feat to excite ental. She also aroused a profound feeling of sympathy for an operatic heroine whose sorrows had long since ceased to cause even provincial breasts to flutter.

reverse of the medal was dis-at a production of "Lohengrin" on Jan. 7. One does not demand too much of "Lohengrin," once the Prelude has been played. But really, it need not be quite so pedestrian. The chorus got so far off key at one point that it floundered hopevivify orchestra or singers thereafter. It was a sad occasion

the Metropolitan pendulum on the evening of Jan. 10, when the bill included "The Barber of Seville" and conductor, howsoever distinguished, will never do, and as saying, further, this Maskowsky does not do, for Gaill-Cure was the Rosina of the Carpers to many deserved, developed to their limit, and this Maskowsky does not do, for Rosini item. When she had overcome an apparent uneasiness she used things doe in an American canons that the Damrosch public wishes to have things doe in an American canons that the Damrosch public wishes to have things doe in an American canons the success of the season stated above. He tries to express too many ideas within a many ideas with a many ideas within a many ideas with "The Barber of Seville" and ter's "Skyscrapers." Mme.

penter's ballet for the first time was the depth of pathos inherent in it. The work is a really ruthless revela-tion of the futility of a merely ma-terial civilization. This is accom-plished without labels. The onlooker may write his own warning and moral.

on this occasion wanta Landowska played a plano in a Mozart Concerto and a harpsichord in De Falla's chamber piece written for her and already reviewed in these columns. But in Boston she had used a harpsichord for Mozart, too. And we found it more charming and closer to the mood of the music than the modern

By WINTHROP P. TRYON

NLY one solution of the New NLY one solution of the New York Symphony problem seems to me to promise satisfaction. to me to promise satisfaction Walter Damrosch should be suc ceeded by a musician whose bring-ing-up, socially, politically and artis-tically, has been American. The question hinges, to my thinking, not on the ability of this or that visitor from Berlin or Vienna, but rather on the predilections of the audiences. Mr. Damrosch, working over a long period of years, has got together groups of supporters who delight in the concerts as an enterprise origithority from no remote place what soever. His policies answer to their notions of orchestral fitness. His programs have something about them that is peculiarly of New York. In recent seasons, Mr. Damrosch lege of hearing other men's pretations besides his own. He has

invited distinguished conductors from Europe to direct the orchestra made the players produce an en-chantingly delicate tone, and brought certain old-school masterworks to the highest refinement of presentaion. Mr. Klemperer, lastly, has combined the impetuosity of Coates with the elegance of Walter, and he has added a touch of style Mahlerian that may be regarded as tradition undefiled. But for some reason or other, listening has languished when Mr. Damrosch was away. The house applauds, no matter who leads. It is seldom ready, however, with its best response, unless he holds the baton.

There are those who declare that Mr. Damrosch has not really re-signed from the conductorship, and who express the opinion that if the will remain in command. strikes me as saying that a European conductor, howsoever distinguished, will never do, and as saying, further,

sider an orchestra which properly and by historic rule plays under European conductors, the New York Philharmonic Concert in Carnegie The orchestra had been well Orchestras

Orchestrally, there has been wealth of material in the last 10 days. The glamorous Mr. Stokowski and his Philadelphians presented an all-Bach program in Carnegie Hall on the evening of Jan. 4, with no less a viola player than Mr. Bailly as one of the soloists, Harry Kaufman as planist, and several choir leaders also playing solo parts. "Too much Bach" was one comment. This exception seemed to us not well taken. A juster one was "Too much Concerto Grosso"—for three of the numbers bore this designation. The performance was superlative. So also was that of the evening of Jan. 3, in Philadelphia, so far as its orchestral numbers were concerned. On this occasion Wanda Landowska played a plano in a Mozart Concerto and a harpsichord in De Falla's

Does Your Child Enjoy This Advantage?

Children beginning plano study must first learn to acquire correct touch. Your child will make better progress, when his practice begins on a plano containing the Wessell, Nickel & Gross plano action. This action's perfect balance and delicate responsiveness aid little fingers in establishing correct habits of touch and of tone production. Children love the crisp, easy feel of the keys on a plano Wessell, Nickel & Gross equipped.

Moreover, your insistence on a Wessell, Nickel & Gross equipped plano assures you a quality instrument. This famous product—the world's highest-priced plano action—is found only in planos and players of established excellence.

WESSELL, NICKEL & GROSS New York

Music in Paris

By EMIL VUILLERMOZ

Paris, Jan. 1 ECENTLY the Opera Comique

It was not a love of music that caused all this exuberance. The peculiar circumstances of the composer were confided to the archive and a pianist in small orchestras. But these humble, badly paid tasks condemned him to servitude and did not even give him time to devote not even give him time to devote himself to composition. On the magnificent poem of Verhaeren he had written the score of the "Clottre" the boisterous, rather childish public no one would take this familiar licity articles that preceded the presenter of the presenter of the control of the presenter of the control of the control of the presenter of the precedent of the presenter of the presenter of the presenter of the precedent of the presenter but no one would take this familiar figure seriously.

"He Who Gets Slapped"

It was then that Michel-Maurice Lévy, having decided to end these wretched conditions, resolved to make a mock of the ignorant egotis- sympathy. violas twitter by themselves in one tical public before disappearing. He of the quieter Tchaikovsky passages made a despairing attempt to find a I heard at Æolian Hall on the same mentaries to accompany actual films at 30 francs a night; he rapidly jumped to 3000. And it is thus that this artist, whom serious music had condemned, was saved by clowning.

Michel-Maurice Lévy has now regular engagements in artistic caba-rets and in big variety theaters. He tours Europe and at the very moment the Opéra Comique gave the first performance of the "Clottre," the Champs Elysée music hall announced a series of performances by the joyous Bétove. A Shakespearean contrast over which the philosophers

are still gloating. One knows indeed the gravity and seriousness of the subject of the "Cloitre." In a monastery are gathered a certain number of monks who of humanity. There is an ambitiou monk of a dominating disposition, Dom Thomas, who dreams of ruling the realm of symphonic creation.

We may not agree with all this over his comrades, a noble old man composer has to say, nor are we of serene character, Dom Militien, a quite willing to accept altogether mystic, pure as a child, Dom Marc, his manner of expressing his musi-cal thoughts, but for sheer power, for fecundity of invention, for skill in the use of the orchestra, and the Prior who leads his difficult flock

> Noble Composition The study of human characteris-tics and weaknesses in a religious community was treated by the poet with a nobility of expression and sentiment that are quite remarkable.

He makes the best use in the world of the beautiful lyrical locutions which suit the subjects he treats and the situations he meets. gave the first performance of him? Is not that the case of nine-the lyric drama taken from tenths of the musicians of today the "Cloitre" of Verhaeren, by M.
Michel-Maurice Lévy. All the Parislan press gave particular attention to this musical event.

It was not a love of the musicians of today to whom one has never thought of making a similar objection? Does one more than once or twice in a century find a man of genius who completely overturns the technique.

nically strong, well carried out, in excellent style, of frank, direct with photographs to illustrate the story. M. Michel-Maurice Lévy, well-known in Paris circles, was for a sounds marvelously. And from one long time an accompanist and coach end of the work to the other one feels a sincerity, faith, emotion and hu-manity that are very poignant. Under these circumstances, the im-

entation of this work and which, for the ignorant, have falsified the judgment of this artistic production. Let us hope that the public may show themselves more just toward a work that deserves their confidence and

A New Ballet At the same time the opera pro-duced a new ballet, "La Princesse de Koridwen," of Paul Ladmirault. The subject is extremely thin and cannot have cost its author a great effort of imagination. The scene takes place on an island of Amor in the Celtic period. In this island priestesses and druidesses, far from the sight of men, devote themselves to ritual ceremonies. A bold tribal chief steals in among them and during one of their ceremonies carries off one of the priestesses. Then, solemnly in the middle of songs and dances he has his union blessed by an aged druid.

With this simple material, the ballet master has had to compose two acts. This he has done by the usual cess, using all the corteges, processions, incantations, religious scenes, dances sacred and profane, warriors' dances, appari-tions, entertainments given in honor of the bridal pair, wedding processions and apotheoses. Actually, the opera has indulged in a choreographic experiment that is patently retrospective. What is more, it has presented the work in the old decor of the repertory and in shabby cos-

Harmonic Novelties

This negligence is all the more tiresome as the score of Paul Ladmusician, who was from Paris, away from all disputes, in his native Britperament of exceptional originality. A refined artist, whose imagination is filled with visions of landscapes and popular songs, Paul Ladmirault has a supple and delicate style the reserve of which does not always allow one to guess the whole merit at the first hearing. He is not a com-

Italian and Polish Music in Berlin

By ADOLF WEISSMANN
Berlin, Dec. 30
We have arrived at the interval between the two halves of the musical season, which, it must be confessed, as regards mere quantity, was equal to any before the World War. The appearance of Italian and Polish music has completed the international circle, which provides the many discussions already devotable to the many discussions already devotable to the many discussions already devotable the methods without givaling and polish music constitution of the influence of Strayingky and only life in this town.

It was for the first time that Alact, he had appeared four years ago in the Berlin Bechstein hall as a pianist of one of the usual recitals with the utmost cleverness both in the soloist's and the concerto for violin, which which take place there, without being noticed as he deserved. Then he resolved not to come back unless he could succeed in convincing the public that he was one of the representa tives of modern music in Europe. The best means for doing so was, of

this section of stage art does not play a considerable part, it disappeared from the repertory, but not without leaving the impression that Casella was an Italian master who desired to acquire a reputation not by ex hibiting what annoyed the public, but by giving it a pleasant medley of musical dishes agreeable to the palate of most operagoers. An Excellent Planist

Also this time, when he played his

own Partita with orchestra, which had had its first performance in Europe at the Zurich festival, he taking the vocal part. gave his hearers much more pleasure than they usually expect from a modern work. It is always a great the absence of the composer; it is the personality of the performer that often decides the success of a new work. That Casella is an excellen planist and has the capacity of doing anything that is demanded in musical anything that is demanded in musical practice, is already known. If he could, he would certainly play the plano part and conduct at the same time. This being impossible, because of the severe demands made by the orchestra upon the conductor, he contented himself with performing the solutions are in the most effecthe soloist's part in the most effec-

tive way. His manner at the plano aroused something of a sensation. For contrary to the custom of mest pianists he did not show the slightest emotion. In the moments when he had with novelties of harmony that are come his breast, an attitude which led works he gave us unforcetters. works he gave us unforgettable to emphasize the fact that he was not a simple planist, but a planist

mark. The minister drew himself up to an impressive height, and said:
"Young man, there is no attitude in all the world so easy to assume as that of the cricket."

Brilliant alip of the tongue! Truly, there is a happy ease in the attitude of the cheerful cricket. It is agility in repose. Within a domestic environment it still betrays an aptitude for speedy disappearance. The interchangeability of critic and cricket suggests innumerable oppor-

tude for speedy disappearance. The interchangeability of critic and cricket suggests innumerable opportunities. Let the cricket chirp forth his cheerful mood, and let the critic carp his carpings, each of them happy that at a wink the one can become the other, so that the burden of responsibility will fall to the ground between them; in this duality many may find a fitting excuse when needed for this and that.

Hearths are the hearts of houses beautiful. There is the mud hearth trodden into smooth hollows by the pressure of many feet, some of them bare—the feet of babies; some rough-shod, hobusiled and heavy; some the uncertain feet of those who carry a staff. These mud hearths are permested with history. Great contentment may be found before the fire on the mud hearth, but the cricket loves best the brick hearth. There, lurking in the warmed crannies, seeing but unseen, he chirps contentment. Pardon us, O Anacreon, if we substitute cricket for grasshopper and read you thus:

"Cricket, oh happier far

Than the happy gods you are; They share not their heaven, while Happy, make us happy, too."

Give us neither poverty nor riches, ut if possible give us one little, lack-coated, tuneful cricket for our

hearth.

A little, shiny, agile cricket is not a humble nobody; his pedigree is so long that it would make that of the proudest descendant seem as nothing. Another distinction is his: he is said to attain in his musical range the highest note in all nature. And not all unorganized are his efforts effther; his concerts, directed by some great orchestra leader, may be listened to by the silent-footed one on any sunny, late autumn day. Someone has written:

ch the music quickly approach the music quickly ased; heatra, in coats of black, so maintly Prim, with shy and silent speed did vanish Neath the step."

Leich Hunt sings the cricket's

And you, warm little housekeeper

With those who think the candles come too soon.

Loving the fire, and with your tricksome tuns

Nick the glad, allent moments as they pass."

And Markham calls the twilight the morning of the cricket's day

"Sleep, little brother, sleep; I am astir. We worship song, and servants are of her—
I in the bright hours, thou in shadow-time;
Lead thou the starlight night with merry notes,
And I will lead the clamoring day
With rhyme."

Each summer, alas! has its last Each summer, alas! has its last cricket, and other poets have sung of his departure—this little field companion—when his bowers grew brown and the summer closes. We on the hearth care not for seasons, nor for outward conditions. Today, tomorrow, at our own good time, we propose to vibrate. Not over the housetops should our sounds be made, but forth from the cranny of brick.

The multitudinous paths of a new year are but surveyed; they are un-

The multitudinous paths of a new year are but surveyed; they are unbroken as yet; the fields are dedicated to their crops, but the seed is not yet dropped into the furrows, and the persistent weed lies in its patency in the richest and in the poorest hollows. The nests are not built, but the foundations of home swait the thawing out of winter's built, but the foundations of home await the thawing out of winter's frosts. Behind us is the pressure of the ages of endeavor, of success, of loving. One thing is, however, indubitably certain; on many hearths in many lands the cricket will sing, and pause, and sing again.

J. A. W.

Te Deum Laudamus

C. G. WILSON.

At Harvard One Hundred Years Ago

The present students of Harvard have more civilized modes of recreation. I hear of art clubs, and of socities which take pleasure in essays upon political economy and scientific research. I find, too, that some things are allowed which would have been thought scandalous by the wise men of the past. What would our college authorities have said about permitting students to give theatrical exhibitions in a public hall? What deductions of degeneracy would they not have drawn, had they been told that such a stigma as this would ever be attached to their cheffshed institution? Well, every age is apt to arrange the virtues on a scale of its own, and to be becomingly shocked when they get joggled out of place. The students of to-day have undoubtedly pleasures which a moral philosopher would pronounce superior to the rude sports of their grandfathers. . . .

were not so attractive that one would wish to linger in them. I cannot repet, curtain, or any pretense of orna-ment. In a few of them were hung some very poor prints, representing the four seasons, emblematical repre sentations of the countries of Europe and imaginative devices of a similar

Gains in Popular Issues

NEW YORK, Jan. 15—Activity and trength of the railroad shares, specu-ation which was fanned to high pitch merger rumors, featured today's of session of the stock market,

Bear traders endeavored to unsettle he general list by renewing selling the general list by renewing selling bressure against the standard industrials, but they made little headway, and finally abandoned the attempt. Gains in the railroad shares rantom 1 to 5 points in the popular istues, several of which sold at their lighest prices in years. Western carriers made the best howing, atthough brisk accumulation ontinued in the Wheeling & Lake Erie stues.

Ports Assessed Prose

TOTAL Ann. 13—Activity and of the Ann. 15—Activity and an activity and ac continued in the Wheeling & Lake Idrie issues.

The recent rapid rise in Lehigh Valley was explained by the fact that the floating supply of the stock was musually small, thousands of small holders scattered throughout the road's territory regarding the stock, as an investment, and showing no disposition to sell at current high levels despite the fact that it would net most of them a handsome profit.

Pools apparently regarded yester-dry's stiffening of call money rates as temporary, bidding up several specialties in which important merger or dividend developments are rumored to be pending.

The closing was strong. Total sales approximated 650,000 shares.

Further trading in foreign obligations and domestic railroad issues held the bond market steady today. There was little activity in industrials or utilities.

Delaware & Hudson consolidated 5s

was little activity in industrials or utilities.

Delaware & Hudson consolidated 5s went up a point, responding to reports that this road, with the New York Central, is seeking control of the Lehigh Valley in the open market. St. Louis-San Francisco 4s also were active.

That the demand for foreign municipal liens continued to be sustained was evidenced by a point gain by Brenen 7s. On the other hand, Berlin 6½s fell back almost as much. Rhine Elbe 7s with warrants, featured the foreign railway mortgages with a decrease of nearly a point.

Sinclair Oil 6½s declined a half point under profit taking, after steady gains during the week.

Inactivity marked the Federal Government group, which were irregular in price.

FIRMER PRICE TONE IN GRAIN VALUES

CHICAGO, Jan. 15 (49)—With surplus wheat reported being absorbed abroad in a fairly satisfactory manner, wheat tended upward today.

The trade gave evidence of leaning to the view that chances favored higher prices rather than lower from the present level. Harting unchanged to a shade up, wheat gained. Corn and oats also were firmer, corn opening at 'se decline to 've gain, and later showing a slight advance. Provisions inclined to weakness.

Opening prices today were: Wheat corn—May 113%, July 150, Sept. 126%; corn—May 81%, July 150, Sept. 126%; corn—May 48%, July 44%. Sept. 86; eats—May 48%, July 47.

MARKET OPINIONS

Schirmer, Atherion & Co., Boston: We have abiding faith in the United States and in its institutions; we believe there are many stocks which will be higher, much higher probably in a given time than they are today—Atchison, Haltimore & Ohio, DuPont, United States Steel, Northern Pacific, Great Northern, etc., but again we venture the opinion that before 1927 is over much better buying opportunities will be had than are offered today.

Elmer H. Bright & Co.. Boston: Irrepective of the immediate trend which
prices may take, we feel that the outprices may take, and the outprices may take the outprices m

Hayden Stone & Co., Boston: The market is clearly in a state of balance, awaiting further indications from business. Stocks are admittedly high but also aggregate profits have been large. It business were assured of continuing as antisfactory as in 1926 and with the world-wide ease in money there would be no occasion for any wide fluctuations. world-wide ease in money there would be no occasion for any wide fluctuations. Volume of business does fluctuate to some extent, profits in individual lines to a still greater extent. The future course of prices will depend primarily upon the direction and extent of such fluctuation in profits. The probabilities would seem to be toward a somewhat lower level of profits in most lines but in safest course would seem to be to suspend judgment until this factor is more definitely determined one way or the other.

Clark Childs & Co., New York: Priefly, the market is without a trend. That fact necessitates a trading policy which gives attention to special situations rather than the market as a whole until such time as a line of least resistance is indicated.

Hornblower & Weeks, Boston: As yet we see no reason for assuming that the market has definitely turned downward. However, we would be cautious about holding industrials should sudden weakness develop in the rails early next week. In all probability the market will continue to be the same mixed affair and only the keenest of trading will result in profits.

Tucker, Anthony & Company, New York: Oils appear to be gathering a little more momentum, and such speculation as does get under way in the near future is likely to feature this group, together with rails, which, as compared to their values and carming power, are still only moderately priced. 300 Deny RG D 4414

WEEK'S REVIEW OF FACTORS IN STOCK MARKET

News Still Constructive-Oils in Limelight—Rail Mergers Pending

NEW YORK, Jan. 15 (Special)—The events of the week from the Wall Street point of view were of a constructive nature. Experienced corporation officials, bankers and leaders generally, say they are looking for at least sa large a turnover in the volume of frade as last year.

It is pointed out that if this expectation is realized and expenses can be kept at about the levels that prevalled last year, practically all of the companies that paid dividends in 1926 would be able to maintain the same rates in 1927, although some of the large extras might be omitted.

Steel and Oll Positions

Steel and Oll Positions

steel and the reminers expressed massives optimistically as they tehed developments at the automosishow in this city and as they reved reports from their respective

Relative to the steel industry, the

Relative to the steel industry, the sual trade news was encouraging. This was notably true with regard to the announcement that the United States Steel Corporation was operating at about 85 per cent of capacity. This is a substantial recovery within a comparatively few weeks.

The action of petroleum shares in the New York market was spoken of many months. The buying is believed to have been largely for the account of those who are most familiar with the actual position of the industry. It was declared to be materially more stable than might ordinarily be expected at this season of the year, and after a rather long period of quite steady increases in the output of crude soil.

It is now being predicted by cutherly

It is now being predicted by authori-ties in the industry that all of the im-portant companies will make gratify-ing reports for 1926, and that their earnings have started off well in the new year.

new year. Rail Mergers Pending Rail Mergers Pending

The activity and strength of railroad stocks were again attributed more
to the expectation of important developments in the near future with regard to several railroad merger plans
that have been under way for months,
than to the earnings situation. There
was keen interest in the official announcement that a preliminary plan
for merging the Northern Pacific and
Great Northern, and later the Bdrlington, was well under way and would
be the subject of requent conferences
between officials of the three roads in
New York mext.week.

The sensational advance of about 14
points in Lehigh Yailey stock yesterday, after an upture of nearly 5 points
Thursday, led to the belief that more
will be heard in the near future with
respect to plans of the Pennsylvania,
New York Central, Baltimore & Ohio,
and perhaps the Nickel Plate, as to
mergera. The buying of Lehigh Valby was declared to be of a highly
competitive, rather than speculative
pharacter.

Discount Rate Cut Talk
The ease of the money market still
furnishes a surprise to many students

The case of the money market still furnishes a surprise to many students of the situation. In speculative circles there was more or less talk in the learly part of the week of the probability of the Bank of England, the Boston Federal Reserve Bank and the New York Federal Reserve Bank reflucing their discount rates.

Although no change was made, the buying of stocks continued and money in the New York market was decidedly easy. This was true notwithstanding the calling of \$15,000,000 losss yesterday, and an advance in the sail money rate from 4 to 4½ per cent. Walf-Street seemed to think that President Coolidge and Secretary of State Kellogg had acted wisely in placing before Congress the information in their possession relative to political conditions in Nicaragua and Mexico, and their probable effect upon the relations of the United States with those two Latin American countries. The stock market was not disturbed by this affair.

reaching a still better understanding the conferences between Montagu orman, Governor of the Bank of ngland, with Federal Reserve offi-als and other prominent bankers England, with Federal Reserve on cials and other prominent bankers and financial leaders in this city. It is felt that Great Britain will go forward industrially now that her coal miners' strike is at an end, although it is realized that some time will be required to overcome the effects of that unfortunate movement.

Profit-Taking on Rallies and Buying on Declines Keep Price Steady

WHEAT MARKET WITHOUT TREND

winters this week, while clearances from the Gulf continue to be quite liberal.

Visible stocks are decreasing appreciably, and the primary movement is small in view of the big crop raised, showing that farmers are not inclined to market except in an extremely orderly way.

The new crop winter conditions are good, with bare fields benefiting from the excellent snow covering which they now have, from western Kansas all through the winter wheat belt. Candian receipts are still big.

However, stocks of bonded Canadian wheat have been decreased rapidly by tremendous clearances from this continent. Some Winnipeg reports were bullish, claiming that the supplies of merchantable wheat would prove much smaller than expected.

Trade conditions are not suggestive of any big market in the immediate future. Outside buying does not follow the advances. At the same time the market runs into excellent support on the setbacks.

Corn displayed a much stronger tone, with considerable improvement in the cash market, the latter being due to comparatively small receipts. Colder weather was a bear factor, but so far country offerings have not increased much.

Oats were draggy and lower. Rye sold off, after an advance early in the week. Export business in rye was active on several days.

TWIN LEADERS WIN BY 7 TO 0

Yale Club and Columbia U C. Are the Class B Teams Scoring Clean Sweeps

METROPOLITAN INTERCLUB SQUASH TENNIS Class B

NEW YORK, Jan. 15—The twin leaders in the metropolitan Class B squash tennis race for the team championship, the Yale Club and the Columbia University Club, did not take any chance of losing in the second day of play in the second half of the series, yesterday, each winning every match. Yale Club, on its home courts, won, 7 to 0, from the Short Hills Club, though three of the matches went by default. Columbia University Club visited Crescent Athletic Club, and also did not lose a match, and held the home club players as to games also, every battle being settled in two games.

Harvard Club displayed its finest performance of the season in disposing of

Harvard Club displayed its finest performance of the season in disposing of Princeton Club, 6 to 1, on the Harvard Club courts, but the other matches were closer, Montclair Athletic Club defeating Gramercy Park Club, 5 to 2, while the struggle between New York Athletic Club and Interfraternity Club was not settled until the final match, when the Mercury Foot team took third place undisputed, by defeating its rival, 4 to 3, and breaking the tie between them. The summary:

YALE CLUB 7, SHORT HILLS 0 Harry K. Cross, Yale Club, defeated R. Montgomery, Short Hills, 18-15, A. Davidson, Yale Club, defeated E. ark, Short Hills, 15—7, 15—11.

TWELVE LEADING SCORERS IN THE

Season; but, as a result of the Christmas vacation matches, had lost what was once a commanding advantage.

Christmas vacation matches, had lost what was once a commanding advantage.

Arthur Chandler, Leicester City, found the net five times against West Bromwich Albion Dec. 25, a feat which he proved provemed at the expense of Aston Villa, and, at the beginning of the New Year, he was only two goals behind Jennings. Their respective totals were 26 and 24.

With the "international" aspect of the essaon developing rapidly just now, it may perhaps be regarded as significant that of the eight most successful marksmen in the first division of the English League up to Jan. 1, three—Jennings, David Haliday, Sunderland, and Hugh Gallacher, New-Scall United—are Scotsmen.

The Jollon, Montclair A. C., defeated Merle Johnson, Gramercy Park, 12—15, 15—12, 15—12.

The Legan Markey and the expense of Aston Villa, and, at the beginning of the New Year. he

MISSOURI DOWNS DRAKE'S QUINTET

Bacchus Scores Three Field Goals in Last Few Minutes

COLUMBIA, Mo., Jan. 15 (Special)

—The University of Missouri basketball team scored a 27-to-18 victory over the Drake University team here last night in the first Missouri Valley Conference game of the 1927 season here. The Missouri five took the lead from the start with field goals by Capt. T. J. O'Sullivan '27 and K. R. Yunker '28 and held the advantage until near the end of the first half, when a goal by I. R. Myers '27 put Drake ahead. The score at the end of the first half, was Drake 11, Missouri 10. Starting the second half, George R. Edwards, Missouri's new basketball coach, sent two sophomore substitutes, J. M. Roach '29 and G. H. Welsh '29, into the game in an effort to penetrate the Drake defense, which was completely baffling the Missouri forwards. Late in the last period, with Missouri leading by only two points, Coach Edwards sent R. C. Bacchus '27 back into the game and in rapid succession Bacchus made three field goals and clinched the victory for Missouri. The all-around play of Capt, C. J. Everett '27 featured the work of the Drake team, while Captain O'Sullivan, Yunker and Bacchus stood out in the Missouri attack. The summary: ker and Bacchus stood out in the Missouri attack. The summary:

Duluth Ties With Winnipeg Maroons

St. Paul Defeats Minneapolis 2 to 0, Scoring Goals in

First Period AMERICAN HOCKEY ASSOCIATION GAME SATURDAY

DULUTH, Minn., Jan. 15 (Special)

—Two five-minute overtime periods falled to break a 1-to-1 tie between the Duluth team of the American Hockey Association and Winnipeg here last night in a fast game.

Cecil Brown, Winnipeg right wing, opened the scoring at four minutes of the second period when he received a pass from William Borland, right defense, in front of the Duluth goal.

Duluth and Winnipeg had battled through the first period with Charles Gardiner, Winnipeg goal guard, making almost twice the number of stops as Vernon Turner of Duluth. Both men stopped several rushes with dextereus tactics.

Winnipeg scored with only five men on the ice as Arthur Somers, center, was penalized for the remainder of the game. DULUTH, Minn., Jan. 15 (Special)

was penalized for the remainder of the game.

With a one-point lead, the visitors played a cautious, defensive game, making only five attempt at the Duluth goal, while Gardiner made 17 stops. Herbert Lewis, after six minutes of the third period, brought the puck through the entire Winnipeg team unassisted to shoot past Garten playing of the game took place at the end of the thirl regular period, with end of the third regular period, with neither team gaining much advantage. The pace had slowed down in the ex-tra periods and the game ended with the 1-to-1 score. The summary: DULUTH WINNIPEG

ST. PAUL, Minn., Jan. 15 (Special).—St. Paul defeated Minneapolis, 2 to 0, ST. PAUL, Minn., Jan. 15 (Special)—St. Paul defeated Minneapolis, 2 to 0, in an American Hockey Association contest here last night, opening a three-game series by closing in on the third-place Millers in the league race and obtaining an advantage of two victories to one tie in intercity clashes between the Twin-City rivals this season.

season.

A first period minus penalties, a thing remarkable in the annals of Twin City competition, ushered in a game of hard and fast hockey which, as far as the ultimate result was concerned, might as well have ended after the opening 20 minutes.

the opening 20 minutes.

DesJardine shot the opening faceoff back to Goheen, St. Paul's right defense, and the latter weaved through
the Minneapolis defense to the very the Mineapolis defense to the very mouth of the goal for what was probably one of the easiest goals of his long hockey career. The timers' watch marked the goal at 37 seconds. Sixteen minutes later the final goal of the game was scored, Goheen again taking the puck down the ice. He passed to DesJardine inside the blue line and the latter was checked by Hill, but Hill was tricked into returning the puck when DesJardine called to him and Goalie Thompson had no chance to block the shot.

Minneapolis was by no means idle, penetrating the St. Paul defense repeatedly, but Miller was impregnable in the nets and two more periods of hockey, not quite so gentle as the first, did not change the score. The summary:

ST. PAUL MINNEAPOLIS Score—St. Paul 2, Minneapolis 0.

SWISS PREPARING FOR WINTER GAMES

Skating Competition Only One Lacking in Strong Candidates

ZURICH, Switz. (Special Correspondence)—It is evident that a strong Swiss delegation will take part in the Olympic winter games of 1927-28, as Switzerland is organizing them. This delegation includes all winter sports. The Swiss Ski Association has already fixed the training rules for its racer.

already fixed the training rules for its racers.

A troop of 40 skiers has already been chosen from the best athletes and a selection will be made from these 40 skiers during this winter according to their showing at the national and international competitions. Only 12 of them will take part in the actual training for the Olympic winter games.

A special course for the first jumping race competition on the enormous new Olympic jumping hill has been organized.

After the great winter competitions there will be a first long-distance race of 50 kilometers at St. Moritz. Then the first time in a training course of short duration, while the summer will be devoted to individual training.

After this the racers will assemble for a training week in December, 1927, followed by a second training week immediately before the Olympic winter games.

It is peculiar that Switzerland has only a few real candidates for the skatoning for the course of the second standard for the skatoning for the training course of the Los Angeles Country of the Los Angeles Country of the first time in a training week immediately before the Olympic winter games.

A for the swinter competitions there will be a first long-distance race of 50 kilometers at St. Moritz. Then the first time in a training course of short duration, while the summer will be devoted to individual training.

After this the racers will assemble for a training week in December, 1927, followed by a second training week immediately before the Olympic winter of the same of the second of the tournament. The second of the sixth that the summer will be devoted to individual training.

After this the racers will assemble for a training week in December, 1927, followed by a second training week immediately before the Olympic winter will be a few real candidates for the skatonia and the team defeated John Black of Kansas and the team defeated John Black of Kansas and the second of the scores were:

R. A. Cruickshank and John Golden, both of New York, defeated George L.

It is peculiar that Switzerland has only a few real candidates for the skating competitions. Presumably, the well-known Swiss champion of Davos, skating competition, while Switzer-land itself will not be represented at the race. Good teams can be expected for the bobsleigh competition. Se-lections will be made during the Swiss ections will be made during the Swiss championships and the courses on the Cresta Run at St. Moritz. In the ice hockey competition Switzerland will presumably play a better part in 1928 than it did in 1924, because the Swiss team won the championship of Europe in 1926.

RECORD CROWD SEES MICHIGAN DOWN IOWA Davidson Only

IOWA CITY, Ia., Jan. 15 (Special)— University of Michigan won its second Intercollegiate Conference basketball game here last night, displaying a bril-liant long-passing game to defeat the University of Iowa five, 41 to 22. The Wolverine attack was led by F. A. Harrigan '28 and W. E. Petrie '28, a pair of stellar guards who contributed five field goals apiece to their teams' total.

tempts.

C. H. McConnell '27, Iowa's great back guard, made three long shot and a free throw for the Old Gold team, and was high-point scorer for the losers.
Six thousand spectators, the larges

Six thousand spectators, the largest crowd which has ever witnessed a basketball game in the State of Iowa, attended the dedicatory exercises of Iowa's new \$440,000 field house. Belfore the game, Gov. John Hammill, George T. Baker, president of the State Board of Education, and Maj. John L. Griffith, commissioner of Intercollegiate Conference athletics, made speeches of acceptance and Dr. Paul E. Belting, director of physical education at the University of Iowa presented 24 ex-Iowa athletes with monogramed sweaters in recognition of services' rendered before awards were granted to athletes.

E. R. LARIGAN AND R. B. HAINES LEAD

Advance to Second Round in Yale Club Tourney

Special from Monitor Bureau

NEW YORK, Jan. 15—Rowland B.
Haines, Columbia University Club
champion, and Edward R. Larigan,
United States Class B champion, led
the field in the first annual Yale Club
invitation squash tennis tournament,
as the result of the first day of play yesterday. Each had a bye, and each
won his second round match in
straight games, Haines defeating Lindsay Bradford of the home club, 15—3;
while Larigan disposed of W.
H. English Jr., of the Heights Casino,
a newcomer in the higher ranks of the
game, 15—2, 15—10.

Most of the other first round matches
were completed, with the expected resuits, leaving 31 players still in the
race, including all of the seeded stars.
YALE CLUB INVITATION SQUASH

YALE CLUB INVITATION SQUASH TENNIS TOURNAMENT First Round

Charles M. Bull. Crescent A. C., won from W. D. L. Starbuck, Columbia U. C., by default.

J. S. Davidson, Yale Club, won from Murray Taylor, Harvard Club, by default H. R. Mixsell, Princeton Club, defeated J. C. Tredwell, Crescent A. C., 15—8, by default.
George G. Davidson, Crescent A. C. defeated Norman F. Torrance, Crescen A. C., 15-3, 15-7.

Second Round Edward R. Larigan, Crescent A. C., defeated W. H. English Jr., Heights Casino, 15—2, 15—10.
Rowland B. Haines, Columbia, U. C., defeated Lindsay Bradford, Yale Club, 15—3, 15—3.

MINNESOTA WINS' FROM WISCONSIN 1-0

MADISON, Wis., Jan. 15 (Special)
—With a new hockey team aside from
Capt., P. C. Scott '28, University of
Minnesota won the first of a series of
two games, opening the season here
last night from University of Wis-

two games, opening the season never last night from University of Wisconsin, 1 to 0.

M. J. Gustafson '28, the Gophers' speedy left wing, skimmed down the length of the rink in the second period to score the only goal of a closely-contested struggle. Up to that time the Badgers had been playing on even terms with last year's Big Ten champions and a lack of shooting ability was all that prevented them from scoring when, time after time they carried the puck down fnto the opponent's zone.

Reserve strength turned the advantage to Minnesota and the excellent defensive work of D. O. Mitchell '29, goaltender, and J. M. Mason '29, Badger right defense, was all that kept the score from being more one-sided. About 1000 persons witnessed the game. The teams meet again tonight. The summary:

MINNESOTA.

JAMES IS WINNER OVER R. M. PURVES

Princeton Easily Beats City College

INTERCOLLEGIATE SWIMMING

Pennsylvania ... 9 1 4 54 .000

PRINCETON. N. J., Jan. 14 (Special)—Taking every first and all but one second place and breaking two pool records, the Princeton University swimming team easily defeated the College of the City of New York in their Intercollegiate Swimming Association dual meet here last night, 34 to 8. In water-polo the Tigers did not have such an easy time as they won hy a margin of only two points, the final score being 15 to 13.

The feature event of the evening was the 200-yard breaststroße race in which T. C. Wallace '28, Princeton, had a great race with Capt. B. F. Epstein '27, City College, the former finally winning by inches and being forced to make a new pool record of 2m, 49.8s.

An important fact which should be considered by the members of the legislatures of the sev-

State Tax **Problems** Looming

eral states of the American Union in their deliberations now generally being carried on, is that in addition to the increased funds which have been raised by the states and their subdivisions during recent years

by direct taxation, there has been an increase in the bonded debts of the forty-eight states of \$982,000,000, representing a total 175 per cent higher than the debts owing in the year 1915. These figures are indicated by the estimates made by the Census Bureau for the year 1924. It is a well-known fact that the bonded indebtedness of many of the states has been increased

since that time. President Coolidge has often, during the last two years or more, called the attention of the public, and of the governors of the states, to the fact that five years ago the Federal Government was spending \$6,000,000,000 out of \$9,000-000,000, which was the total expenditure of governmental units of all kinds, while today the Federal Government is spending \$4,000,000,000 out of \$11,000,000,000. Otherwise stated, the Federal Government has economized to the extent of \$2,000,000,000 a year, while the states and their subdivisions are spending \$4,000,000,-000 more annually. In commenting upon this showing, Governor Brewster of Maine recently

The philosophy of governmental retrenchment is to leave to our citizens the liberty of spending the money that they earn, rather than taking an increasing portion of their income (now practically 20 per cent) in what are largely nonproductive enterprises, or which are, in any event, enterprises departing widely from the theory of individual initiative, and going very far into the realm of the socialization of the state.

Many conditions have combined to increase the expenditures of the states and their subdivisions. Perhaps from the point of dollars the necessity of building and maintaining roads and streets has caused the heaviest drain. Analyzing the items which have made up the budget upon which the loans to the states have been based, it is found that out of the \$982,000,-000 increase in the total debt of the states, \$497,000,000 has been expended on roads and highways. In addition to the funded or bonded debts of the states it is shown that it is a quite prevalent practice to issue current obligation notes or warrants, indicating temporary borrowings in advance of the payment of tax bills. Census figures are quoted as showing that certificates to the amount of \$244,000,000 were issued in 1924, compared with \$68,000,000 in 1915, an increase of \$176,000,000, or 258 per cent, in nine years. Thus it appears that the funded debts and the so-called current debts of the states in 1924 amounted to \$1,759,000,000, compared with \$580,000,000 in 1915, an increase

of exactly 200 per cent.

However insistent the demand upon the funds provided, and however worthy the purposes to which such funds were devoted, it must be agreed that they could not have been so generously expended or appropriated but for the ease with which investors were induced to underwrite and subscribe for the bonds issued. The income from these bonds being exempt from taxation, private investors have sought such securities and have paved the way, in some instances, for their issuance. It is not improbable that legislators, county commissioners and selectmen have found it convenient to advertise their own generosity and progressiveness by agreeing to the liberal expenditures that have thus been

made possible. We believe it is not only proper, but highly important, that thorough inquiry be made, without delay, into the purposes for which it has been deemed necessary to impose these higher taxes upon the industries of the country, and in addition to pledge the credit of the people and their industries for a generation in advance. In some sections of the United States, and particularly in New England, commercial organizations and others perhaps more intimately concerned are exercised because of the tendency of important industries to suspend operation or to seek more favorable locations in other sec-

tions of the country.

It is admitted, of course, that the owners and users of automobiles, autotrucks, and autobuses, which collectively include a considerable portion of the people of every state and community, are those who have demanded and insisted upon the better-roads programs which have been carried out. As their numbers increase they will be more and more insistent, and it is quite probable that still greater sums will be devoted to the construction and upkeep of the highways. Nine years before, in 1915, the total number of automotive vehicles registered in the United States was 2,445,000. The census figures of 1924 show the total for that year to have been 17,594,000. The number had increased more than seven times. It is intimated that if the states and their subdivisions had carried on road building only as they were able to meet the cost in cash, instead of borrowing funds for the purpose, the development of the automobile industry would have kept pace with the growth in good roads. Comparing the state debts outstanding in 1924 with the number of automobiles registered in that year, it is shown that there was owing by the states and their subdivisions approximately \$40 on each car. This is shown to account for almost one-half of the increase in state debts for the nine-year period.

But even with this showing, and with the increased expenditures for other purposes, it cannot be charged that a wrong has been inflicted upon the people, or that poor judgment has been exercised. It is for the guardians of public funds everywhere to determine the uses to which such funds should be put. If those who contribute to these funds and who give assent to the mortgaging of their future incomes, as well as the incomes of their children, are so indifferent that less than 50 per cent of them go to the polls to choose their lawmakers and their administrative agents, those who fail to vote have no good reason to complain if they are called upon to support policies which they have not sanctioned or approved.

A digest of an important book, "Three Princi-

ples of the People," by Dr. Sun Yat-sen, re-former and publicist, whose writings have had much to do with the awakening of China, has been translated by Chester S. Miao for the China Christian Education Association. These fundamentals to Chinese sov-

Dr. Sun and Chinese Nationalism

etelgnty and success, according to the book, which is regarded as one of the chief influences animating the Southern Chinese nationalist movement today, are "nationalism, democracy and socialism," three requisites, in Dr. Sun's opinion, if China is to be saved from disruption

and to continue as a world power.

The West has something to teach the Orient, says the author, but before China goes afield to learn what is best in the Occident, her people must recover the sense of nationalism which, owing to pacifism, China has lost within the last hundred years. To accomplish this the Chinese people must revive their old learning and such characteristics as unity, loyalty, filial piety, benevolence, faith, righteous government, sincerity, industry and invention. These are held to be essentials. Democracy is approved for two reasons: first, because "China desires to follow the political trend of the world," and secondly, because "democracy is one of the best

means to put an end to our civil wars."

Discussing what are to him the elusive elements of democracy—liberty and equality—Dr. Sun points out that, "aside from blunders and follies," China has few positive lessons to learn from the nations in the West. "In the past," he writes, "the Western peoples had too little personal freedom. So in all their revolutionary wars they fought hard for liberty. Historically, this has not been true in China. Our people, thus far, have had too much personal freedom. As a result of that, we have become a plate of sand and are helpless in face of foreign imperialism and its economic conquest. So what we need now is not to fight for more personal freedom, but to sacrifice some of our personal freedom in order to gain our national freedom.'

The people of China, he states, are mainly poor, and commerce and industry, therefore, have not yet been developed. Revision of "unequal" treaties to permit tariff autonomy, and control of capital and land, are the objectives recommended by Dr. Sun, who says:

Our great and immediate problem is not economic in equality, but economic poverty; not a fight against capitalists, but the prevention of the rise of capitalists in the future. Our method of solving this problem is to develop state industry. Since we do not have enough experience and capital to develop that, it would be wise for us to employ foreign specialists and to borrow for-eign capital to help us. . . . We do not have great land-lords as they have in the West. But since land is vitally related to the people, we ought to work out a preventive policy now. Our policy is easy and simple. First, the Government should tax or buy all lands according to their value. Second, the value of the land should be fixed by its owner. Third, after the landowner has fixed his land value and reported to the Government, any future increase in the land value should belong to the Gov-

Political equality and "service" as the goal of life complete the program Dr. Sun had in thought for the betterment of his people. He would do all possible to augment the Nation's supply of food, clothing and shelter by introducing machinery on Chinese farms and developing modern methods of transportation and manufacture to prevent famines. Back of all the natural handicaps, the book points out, are the treaties which hang like an incubus around the neck of the oldest nation in the world.

Fielding H. Yost, famous University of Michigan football coach, states in an article in Human

A Valuable Factor in Athletics

Engineering that love is the most essential quality in the development of a great football eleven. He explains further that love, shown in love of pals, love of the game, and love of the school

the boys play for, is a positive force, and adds that with it go other positive forces, such as faith, courage and truth, all of which combine to furnish the boy with the best qualifications for a successful gridiron career. And in this sense he includes college athletics in the categories of institutions in which youth is taught valuable lessons in unself-

ishness and perseverance. The main objective which every athletic coach aims to reach is, of course, the consistent development of winning teams. Each, necessarily, has his own methods of procedure. Approximately thirty years of experience as a football mentor have given Coach Yost an intimate understanding of boys and athletics, as well as of their relationship to each other and to the college. It is quite reasonable, therefore, that when he looks beyond the more commonly accepted requirements for success in athletics and points to love as the most potent factor of all, sports followers everywhere are willing and ready to give more than passing thought to his

It is true, especially of all college athletic competition, that there is in evidence an element of unselfishness on the part of contestants which has about it a beauty and grandeur all its own. Indeed, it seems illogical that a college athlete who goes through the ordeal of a long, arduous football season, or who struggles for years to obtain just one opportunity, perhaps, to play in some big game, is not, at least in a measure, inspired by a "love of pals, love of the game, and love of school." The athlete who puts forth his best efforts and enters whole-heartedly into a contest for the main purpose of helping his team gain top honors is quite common on the college field of battle. And this characteristic attitude of selfless service is apparently lending an increasingly higher aspect to college athletics, and deserves greater development. In this respect, also, the boy profits immeasurably in character building. The athlete who learns the lessons of unselfishness and perseverance taught him while training for a place on the college team has prepared himself for a more

useful place in after-college life. Building athletic teams on the basis of love has apparently proved a huge success with Coach Yost, as his record substantiates. Through this higher method of coaching, better men as

well as better athletes, are being trained. Take any one of the great sporting figures of the present century—Walter Johnson, veteran baseball pitcher; Paavo Nurmi, Finnish distance runner; Charles Paddock, world-famous sprinter; William Tilden, champion tennis player; Charles Hoff, leading pole-vaulter; John Weissmuller, star swimmer, and the many others, and in most cases the impelling power behind their seemingly tireless efforts, which spurs them on to continued victories, can be traced to an unquenchable enthusiasm for the particular branch of sports in which they participate. Great works are being performed by men and women who are imbued with love for all mankind. He who loves most to serve his patrons is generally found to be the most successful business man. He who most loves his country, best serves its people. Indeed, the power of love is asserting itself everywhere in the many walks of life. Where it is most apparent in athletics there is apt to be found an attitude of co-operation and har-mony which is indispensable to the development of the highest type of teamwork.

An Associated Press report recently told of the fact that the people of Poland have apparently given up reading. Forty-eight libraries, one is told, have had to go out of business this last year. Presumably the cause for this state of affairs is to be found in the lack of educational facilities, and unquestionably this in turn is due to the postwar difficulties through which the country has passed. How impossible it is to trace a tithe of the untoward results of the war, but certainly not the least important one must be considered this strange loss of interest in reading. Without the mental activity which is aroused by proper study, the course of a people can hardly be expected to be on the upward path.

Double-bass playing, an occupation hith-erto more honorable than romantic, is assum-

ing significance, as the symphonic art develops. Double-bass tone, formerly regarded as a sort of support only, is em-ployed by modern com-posers for effects of firstrate importance; and besides that, is treated by

The Double Bass in the Orchestra

conductors, even in the presentation of old-school works, as a principal element in the ensemble. The double bass, in Haydn's music seldom more than a re-enforcement of other instruments, begins in Wagner's to have a rôle of its own, and becomes in Stravinsky's a quite independent voice. And regardless of periods, the great bass of the string family is considered nowadays of equal rank with anything else in the orchestra; according to a generally accepted maxim that no agglomeration of sounds can be good, unless every detail of sonority of which it consists is good.

Besides having had to take a secondary place in the harmony/being for a long time permitted but to repeat the notes of the violoncello an octave below, the double bass has been com-plained of and jibed at. Sullen, inflexible, never to be subjugated—the bull fiddle! There was a time, though, when it held a dignity above that of concert halls. Perhaps there still remain in New England, here and there, meeting-house garrets that have not given up to exploring antiquarians the bass viol, of the three-string order, upon which the congregation used to be led in singing.

For its size, the instrument is remarkably inarticulate and unassertive. It is a vexation, no doubt, to those who write scores and to those who direct interpretation, and possibly also to those who listen, that it so often fails to hold its own, even at ten to one, against the low voices of the brass and the wood wind. Nevertheless, whether through improved execution on the part of performers, or increased knack for balancing tone volumes and contrasting tone colors on the part of conductors, it is finding-itself anew in the symphonic scheme. Something sure to be asked when musicians discuss an orchestral organization in these days is: What about the bass of the string section?

Random Ramblings

Not long ago Alexander Graham Bell found great Not long ago Alexander Granam Bell found great difficulty, in making people believe his claims regard-ing the telephone; today England and America are talking with one another; tomorrow an Englishman, talking to a friend in New York, will exclaim: "My, but I'm glad to see you." How long will it be before we are wirelessly shaking hands?

Lest we forget: This month of January marks the anniversary of two great victories for freedom in American history. On-Jan. 1, sixty-four years ago, the Negroes were released from the slavery of servitude. On Jan. 16, seven years ago, the people of the United States were released from the slavery of the licensed liquor traffic.

English cooks report more than 150 ways of pre-paring the humble potato. How do you like yours-boiled, or baked with the jackets on? There's only one way of eating them, anyhow.

Banking transactions to the amount of \$6,000,000 done on the opening day of the transatlantic radio-phone shows that some pretty substantial business can be picked out of the air.

Boston Natural History Society reports a remask-able specimen of cosphorite. Oh, yes, it is associated with the rhodochrosite, but it is lighter brown.

A literary exchange says that it has been a great year for books—but it remains to be seen whether it has been a year for great books. The American motorist has long known of the gasoline-eating bug, recently discovered in Germany. It is called a carbur-eater.

While a minority is engaged in snow-shoeing, the large majority is engaged in snow-shoveling.

-The "Curfew must not ring tonight," says New York. It has set the time at 3:00 a. m.

A tax on tires is bad enough, but tacks in them Two heads are better than one. Ask the barber.

The whiffetree has but a single nut.

Six Thirty

TT WAS four o'clock, although the newsboy below at the corner of the street banged out, "Six thirty," in a voice like a minute gun. It had been raining all night and most of the day until this hour, when the earth steamed like a herd. Hazes breathed out of the river, fogs moped over the sea, and clouds dissolved the lumps

At four o'clock there was hardly enough light to read by in the room, and the sky was mired and rutted with swollen clouds and with the wild gas flare of sunset puddled among them. Looking at the sky I remembered streets in London at this hour lurid with coster's flares, yellow flame snagging out of the parafin cane; indigo shapes of men and women on the muddy cobbles, the cast iron cries, the cold that seemed almost warm in the half

Here was a street of costermongers and their barrows and a man blowing himself with straining blasts into cornet. It was a scene as bright as cheap jewelry, as hard and brilliant as a hippodrome, for the hour transmuted everything. It was the newsboys' hour of headlines and excitement when the clouds were as black and as damp as printer's ink on a placard and the sunset more sensatural than the same

Looking from the window of the darkening room I saw these scenes again, for they jumped and scattered out of my thought as a tune hits out of a barrelorgan.

"Six thirty! Special!" His voice was like shrapnel. The houses in the Green melted into one violet pallisade with yellow squares of light cut in them. The Green was a lake of mist from which the limbs of the trees issued like smoke. Earth and sky were dissolving into one. The ends of walls and the corners of streets were bitten off by the fog. Against the sky the regiments of chimneys were drawn up to the drum tap. On roof after roof they appeared in sharp platoons. They appeared silently with the sun blazing behind them like a bugle. Beyond all, stuck up a black factory chimney like a gun with the peaceful smoke of salute in its mouth.
"Six thirty." He knew there was something in the hour that could not be reckoned on a clock. As sky and earth

that could not be reckoned on a clock. As sky and earth melted together, so past and present seemed to mingle, for the world had no clear aspect but was blurred and only half in the light like something seen in memory. The hour carried the world back into the past and the world was sad. And why sad? Sunset had learned that trick of vagueness from memory and gave a false haze and softness of melancholy to things that were vivid

Better was the cry of the newsboy two hours or more ahead. With a poet he might have thought, Be thou upon our lips the trumpet of a prophecy

for it was an hour of prophecy and not of sadness—thing that could not be reckoned on a clock.

I saw from the window a wing of cloud turned to the light and filling its arch with white brilliance. Like a bird it turned and commanded the sky. For a moment the world seemed to pend from it; the sun, falling more deeply into the west, took back its light and the wing emptied. Time after time this happened till the sunset was loud with the beating of wings of fire, rising, turning, poising and veering to nothing.

So in this hour little things flashed into a wildish significance; and disappeared as a bird vanishes into the deeps of the sky. A woman with a perambulator crossed the street. Her face, looking this way and that, was alight and she was hurrying. Where? She was gone. Things passed as quietly as owls in the dark.

A traction engine came straddling ponderously: it had

and she was hurrying. Where? She was gone. Things passed as quietly as owls in the dark.

A traction engine came straddling ponderously; it had all the mystery of Milton's unknown "two handed engine at the door." But it was gone. A bicycle hit and rang by like a hailstone. Trams churned up the shadows on their booming path and the trolley struck planets of fire above. The trams pitched and rolled like ships and the lights splashed and crumbled before the cut of their bows.

A man bent down and cranked his car, and even in the room I could hear the drum-roll, click and pervasive muttering rhythm of his engine as it ticked over. Invitation to the dance: the trees in the Green trembled and shook and swayed and seemed to be a-tiptoe for it. But he went away and they sank mutely back to their heels. They were silent: on their myriad strings not a note: Their branches, bare of leaves, were as slender as webs, as fine as an etcher's stroke, as slim and rich as frost on a pane. The streets lying from north to south were silver. The streets bared east to west were silver and pink like shallow blades of shell. Over the streets the silent cars hissed and seethed. Their lights stared and sometimes it was the furious dilating stare of headlights. Some cars flew on deep spindling reflections of themselves in the wet. Other cars passed and pushed before them a tray of light that clipped up and jingled all the silver of the streets into it. The cars passed and were extinguished like thoughts.

The roads pouring from north to south went to the sea; and the plank, swish and gasp of the sea were like the excited breathing of a man running a race. The roads to the west rose like the long cold blast of a whistle to the mountains. They did not have the warm purple and daubed hazes of the city for long. There were no lights where these roads went, only the damp guttering stars and the moon like a spoonful of milk.

These roads may have felt the hobnails of a man's boot, or a cow's hoof, or may have seen the glitter of a doe's

or a cow's hoof, or may have seen the glitter of a dog's feet. But they were as cold and single as whistle. In the mountains they rose till they split the wind and struck the clouds. Their cry there was the curlew's and startled the long faces of the rocks, and the rabbits nibbling the

It was strange, while the flare of light was hissing in the sky, to think of the western roads whistling their silver between the hedges of the Midlands and the stone walls of Connaught, and ending at the sea. For at the soa, wherever the squeak of a bird is, there may be the end of a road.

There was a bubble of light in the room but the flame There was a bubble of light in the room but the flame of the west, had poppled out and an oily brown smoke of cloud reeked where the flame was. The light was from the moons. There were ranks of them swinging from the tram standards, electric moons creaking in the wind. The gas lamps sang at the street corners. A tram chimed. An enormous shining eart horse steamed by like an express. "Six thirty." He wielded his tongue like a Cyclops, his hammer on the anvil. He was beating sadness into prophecy that we might ride well shod through this hour of his. And he was still an hour ahead. V.S.P.

The Press of the World

The opinions expressed in the quotations hereunder do not necessarily carry the indorsement of the Monitor.

Is Love Greatest Asset in Football?

THE famous Michigan coach, Fielding H. Yost, says it is. When he was talking to a reporter recently about the qualities that make a great team, he paused and said: "And the greatest of these is love."
When he was asked if he could build a winning team on this Biblical tenet, he said a great team cannot be on this Biblical tenet, he said a great team cannot be built without the so-cailed heart qualities. Of course, other qualities are also needed, too—physique, health, and endurance. To Yost love is a positive, creative force. "Love of pais," he said, "love of the game, love of the school the boys play for. Hate is a negative force, while love is positive and makes for strength for the best fighting type of man, especially when it comes to fighting for the things in which he is interested. With it go courage, truth, and faith, all positive forces."

Under the right leadership in sport, the boy learns that

courage, truth, and faith, all positive forces."

Under the right leadership in sport, the boy learns that he must earn his position. Pull and influence will not get a place for a weakling on a football squad. He must make himself fit and keep himself fit. If he learns his lesson properly, he will be ready for life in the big world. The ideas that win in sport are the ideas that win in business. Inspired only by faith and ambition, a boy will work months trying to get on a team. He knows he will get on if he qualifies. The coach isn't playing favorites because his job is to produce a winning team.

because his job is to produce a winning team.

Later, in business, the boy with the right stuff in him will work with the same faith and ambition at drudgery, knowing all the time that by doing his work well he is only preparing himself for positions higher up, where the bigger rewards are to be found.

Coach Yost and all the other great developers of athletes are man-builders in the truest sense. They know

letes are man-builders in the truest sense. They know that training of body, mind and heart must go together. Character expresses itself in play as much as it ever expresses itself in work.—Human Engineering.

Original "Song Plugger"

America's original "song plugger" and music publisher was none other than Benjamin Franklin. Furthermore, the songs were his own compositions, for the statesman, inventor, printer, diplomat, philosopher, and educator on was a composer and an all-around musician. . . . On many an evening the sonorous voice of Franklin was heard in chorus with his friends. He was an orthodox believer in correct tempo in music, and it is not hard to imagine him tapping time. He not only wrote songs, but set them into type and proceeded to hawk them through the streets, thus proving himself a pioneer sales pro-moter. Franklin developed the harmonica or glassy chord. He also was a talented performer on the harp, guitar, and violin.—Philadelphia Public Ledger.

The Cat

The cat would make an excellent diplomatist; he is seldom ruffled, never loses his head, is usually polite, has admirable manners, and great aplomb, and there is that sharp claw concealed in the velvet glove to resent any intrusion upon his interest or felicity. But, above all, he has the diplomatic virtue of concealing what he thinks. Whereas, the dog opens out his whole soul, the cat keeps it as close as an oytser. There is certainly nothing of the "new" or "open" diplomacy about the cat. He looks wise and maintains a grave and dignified silence. He may be cold, he may be selfish, but it must be said in justice to the cat that he does not make a business of ministering to human egoism—like the dog. His own dignity is to him of very much greater importance; he lives his own life, and goes his own way.—London Morning Post.

On Publishing Crime News

We never have and never will publish the details of revolting crimes, whether they be accounts of murders or domestic scandals. . . In respect to crime news, we agree with The Christian Science Monitor that it is better for humanity at large to refrain from publishing the same. In our opinion, many a crime would not have been committed if it had not been for the power of suggestion aroused in the mind of the perpetrator by first having

Sobering Up

John Bull drank but half as much liquor in 1925 as he did in 1924, convictions for drunkenness being but 75,077 as against 183,838. The number of licensed saloons declined from 102,189 in 1900 to 80,420 in 1925. Possibly the Britisher has concluded he will have to sober up if he is to compete with the American.—Los Angeles Times.

The Age of Efficiency

Where is efficiency to stop? We read with concern that where is a enciency to stop: we read with concern that some Chicago matrons who are so busy with society, opera, and charity engagements that they must dress with the speed of a freman, have ticketed their costumes with numbers, filing them in the presses in order that in a moment their maids can find the gown of the moment. moment their maids can find the gown of the moment. These women ao longer have a coral gown or a jade afternoon dress. They have No. 76, Series B, or No. 59, Series E. Shoes or slippers, stockings, scarfs, wraps, gloves, and all other parts of the costumes are ticketed accordingly, and filed in the proper places. When the maid takes gown 47 from the closet, she also takes slippers 47 and wrap 47.

Some clever cabinetmaker probably is now at work on a container resembling a life-size filing case, so that all of the articles going to make up a costume can be put away together. Then, when the mistress rushes into the dressing room from a party or meeting, by pressing an

dressing room from a party or meeting, by pressing an electric button she can cause the number of the required costume to flash on a signal board in the maid's apartment. The maid then will throw a lever which will open the cabinet, lift out the container and shoot the costume along to the boudoir of the mistress, with the maid perched in a kind of suspended swing, - South Bend

"Take a Letter"

It is something of a surprise to learn from Postmaster-General Harry S. New that in 1925 the Post Office Depart-

ment issued 17,482,834.894 stamps; that these stamps had a face value of \$459,281,376.

These are big totals. They suggest that we are a nation of confirmed letter writers. But the facts hardly make such a conclusion applicable to the individual. make such a conclusion applicable to the individual. While the per capita showing is greater than anywhere else in the world, it reaches no such proportions with the rank and file as the Postmaster-General's report seems to indicate. The bulk of the outlay is for business com-munications, and vast sums are spent in forwarding ad-vertising literature dealing with every known commodity

that is merchantable.

This helps to absolve the average American from the This helps to absolve the average American from the suspicion of being a chronic epistolarian; but, granted immunity on that count, after running through the accumulation which daily clutters his desk and chokes the mail box at home, he will hardly deny that, whatever his individual status as a correspondent, we are a nation of confirmed letter readers.—Detroit Free Press.

Congratulations—and Thanks

During the year 1927, we retain one fundamental re-olve as applied to our circulation of news, and that is, solve as applied to our circulation of news, and that is, to never publish any stories relative to murder, divorce, or suicide. We will leave this particular mode of piltering and desecrating the public mind to the yellow journals, some of the misleading American dallies, and the several great and worthy universal press services.

We feel that murder, divorce, and suicide are three things in life that have very "dirty ears," and that they have no place in the constructive elevation of the human mind. In our relation to representative newspapers of America we stand practically alone in our conviction. On solve as applied

America we stand practically alone in our conviction. On our side, however, we have the most educational, wholesome, and uplifting daily newspaper in the United States. The Christian Science Monitor. There is very little religion expounded in the Monitor, but a great deal of real Christianity and brotherly love. It stands for clean thought and clean action, justice, and the obeyance of all laws that are right in principle, and fair to all the people. This is an ideal policy, and the Progress hopes to become more closely allied with it, in spirit and in fact, as it progresses,—Coalinga (Celif.) Progress. America we stand practically alone in our conviction. On our side, however, we have the most educational, whole-

Strikes Obsolete?

The view that strikes, as weapons of defiance, have become obsolete is shared in places other than Great Britain. More than one country has found that the strike has no place, because of the unnecessary expense and suffering that it entails and the disruption of non-allied industries it causes, in the present industrial scheme of things.—Shanghai Times.

Optimism

There never was a man, or a business, or an tion, or a town, or a section, or a country—it there never was anything subject to human it that the spirit of optimism could not help or it simism failed to harm.—Albany Herald.
